

The background of the slide features the Falkirk Council Coat of Arms. It is a shield divided into four quarters. The top-left quarter shows a castle tower. The top-right quarter shows a stag's head with antlers. The bottom-left quarter shows a sailing ship on water. The bottom-right quarter shows a bird with spread wings. Above the shield is a crown with four floral motifs. Below the shield is a ribbon with the motto 'A'NE FOR A'.

Agenda Item 10

Consultative Draft : Historic Environment Strategy for Falkirk

Falkirk Council

Title: Consultative Draft : Historic Environment Strategy for Falkirk

Meeting: Executive

Date: 7 March 2017

Submitted By: Director of Development Services

1. Purpose of Report

- 1.1 This report seeks approval of the consultative draft Historic Environment Strategy for Falkirk 2017 “*Our Future in the Past*” as a basis for external consultation. A finalised draft will subsequently be reported back to the Executive for consideration and adoption.

2. Recommendation(s)

2.1 The Executive is asked to agree:-

(1) the attached consultative draft Historic Environment Strategy for Falkirk 2017 for external consultation.

(2) a finalised draft should be reported back to the Executive for approval and adoption following external consultation.

3. Background

- 3.1 The local historic environment of the Falkirk Council area consists of a wide range of architectural, cultural, historic and archaeological assets and sites which provide us with some of our most distinctive and well – loved places; these historic assets contribute to the local economy and tourism.
- 3.2 The historic environment of Falkirk relates as much to the future of the Falkirk Council area as it does to its past. This consultative draft strategy will ensure that the historic environment is embedded in corporate strategy as a catalyst for future growth and creation of successful places. We can stimulate better place making through encouraging development which is sympathetic to our historic environment and by properly looking after our historic assets and sites. Improved place making promotes inward investment and encourages greater economic activity. Falkirk’s historic environment enriches the character and appearance of the area, and contributes to the current vision that national planning policy NPF3 and SPP have set out for Scotland as a place that is “*successful and sustainable, low carbon, naturally resilient and connected.*”
- 3.3 One of the key aims of this consultative draft strategy is to deliver the vision and aims of “*Our Place in Time*” The Historic Environment Strategy for Scotland 2014 at local authority level. The consultative draft strategy also

takes account of associated national and regional policies on the historic environment; it responds to the vision and strategic objectives of Falkirk Council's Local Development Plan 2015 which in turn have been informed by the Strategic Community Plan and the Single Outcome Agreement.

- 3.4 The consultative draft strategy provides detailed background information on the historic environment of the Falkirk Council area; it also describes the general benefits brought about by the historic environment and highlights past achievements, challenges and opportunities. The strategic vision of the strategy shapes themes which transform into specific and measurable priority actions which are set out in an action plan over a 5 year period.
- 3.5 The action plan includes the following priority actions and projects, designed to deliver the aims of the strategy through partnership working between Falkirk Council and external organisations and groups to:
 - a) Review and update planning policies and guidance
 - b) Review and update Conservation Area appraisals and Conservation Area management plans if required
 - c) Implement programme of Character Appraisals of Areas of Townscape Value
 - d) Disseminate knowledge of and promote maintenance of historic assets
 - e) Promote factoring of communal properties
 - f) Review need for Areas of Special Advertisement Control
 - g) Explore funding for improvement projects
 - h) Explore forming of a steering group to continue monitoring of former THI schemes
 - i) Devise a buildings at risk action plan
 - j) Agree joint priorities with key local partners
 - k) Explore options for developing knowledge of historic assets and applying new technology and techniques to surveying and recording
 - l) Update records
 - m) Create web based local information resource
 - n) Integrate local records with National Scottish Historic Environment Data Strategy
 - o) Encourage local knowledge capture projects
 - p) Encourage tourism and cultural uses for historic sites
 - q) Promote local heritage and landscape trails

- r) Support new uses for Rosebank Distillery
- s) Investigate funding for restoration of Dollar Park
- t) Submit funding bid for Zetland Park
- u) Continue to support the *Glorious Gardens* Project
- v) Continue to convene in - house knowledge transfer events
- w) Pursue involvement with local communities
- x) Consult local groups on the buildings at Risk Action Plan
- y) Explore partnership Working on projects such as Focus Year events and similar
- z) Devise local awards schemes
- aa) Support focussed programmes for secondary schools

4. Considerations

- 4.1 If approved, this consultative draft strategy would replace the existing *Built Heritage Strategy* which was adopted in March 2006; at that time, it fulfilled commitments set out in the Falkirk Council Structure Plan and Local Plans. A key aim of the strategy was to develop a robust approach to the implementation of national and local planning policy for conservation and enhancement of local built heritage. Targeted actions addressing key issues were drawn up and prioritised. Section 5 *Achievements* of the draft consultative draft explains the extent to which many of the actions recommended in the 2006 *Built Heritage Strategy* have now been achieved.
- 4.2 If approved, this draft strategy would form the basis for external consultation and will also enable comments received from consultees to be assessed and, in turn, help shape the finalised document. An updated strategy is required because the national and local context has altered with the passage of time in relation to a number of important aspects such as the following :
 - a) The legal framework and statutory processes under which national organisations and local planning authorities operate has changed as a result of *The Historic Environment Scotland Act 2014*. One of the major changes was the merger of Historic Scotland and Royal Commission on the Ancient and Historical Monuments of Scotland (RCAHMS) to form a non – departmental body, Historic Environment Scotland (HES) with charitable status. *The Historic Environment Scotland Policy Statement: June 2016*, was a replacement for the *Scottish Historic Environment Policy (SHEP 2011)*. The policy statement explains how HES now implements its regulatory and advisory roles and sets out how planning authorities should interpret and implement national planning policy.

- b) Digital technology has advanced, enabling new means of recording, interpreting, gaining access to and engagement with the historic environment.
 - c) With more stringent fiscal constraints on the Council and its partners, an updated strategy will assist in maximising any partnership funding opportunities.
 - d) There is a need to raise awareness of the impacts of physical change on the historic environment. Climate change and other factors such as the effects of inappropriate land management, inappropriate repairs and materials, urban and rural development, transport and pollution have contributed to the continued erosion of the historic environment.
- 4.3 The proposed action plan provides a framework for future discussions on partnership working for the next 5 years or so among Falkirk Council, other key organisations and community groups in the Falkirk Council area.
- 4.4 A range of measures of success are set out to enable ongoing performance assessment. An annual review of progress will also be provided over the currency of the adopted strategy. This review will be submitted for scrutiny by key stakeholders including the relevant Falkirk Council committee(s), Falkirk Community Trust, Scottish Government and Historic Environment Scotland.

5. Consultation

- 5.1 Development workshops with a range of stakeholders in the local historic environment were held in April and November 2016; lively discussion sessions helped to shape the themes and priority actions for the draft consultative strategy. These stakeholders will also be future partners for many of the proposed projects.
- 5.2 In addition to the workshops, other positive meetings and conversations have taken place with the following key stakeholders over a period from May 2016 to January 2017:
- Falkirk Community Trust
 - Historic Environment Scotland
 - Forth Valley College
- 5.3 Subject to Executive approval, further formal consultation on the draft strategy would take place over a 6 week period from April to the end of May 2017. This would use a range of mechanisms including: a simple on-line questionnaire and targeted further outreach work with local heritage groups, partners and agencies. Thereafter it is intended to report back to the Executive with: a summary of consultation responses, proposed Council responses to these and any proposed changes to the finalised strategy by October 2017.

6. Implications

Financial

- 6.1 No additional financial obligations are expected to result from this draft consultative strategy. Any resources would be met from within existing budgets. Partnership working and partnership funding opportunities would be maximised where possible.

Resources

- 6.2 None for Falkirk Council.

Legal

- 6.3 None

Risk

- 6.4 None

Equalities

- 6.5 None

Sustainability/Environmental Impact

- 6.6 A Screening Report for Strategic Environmental Assessment of the draft strategy was submitted in October 2016 to the Scottish Government who co-ordinated assessment of the Report by consultation authorities, Historic Environment Scotland, Scottish Natural Heritage and Scottish Environment Protection Agency. The recommendation from all consultant authorities that a full Strategic Environment Assessment was not required in the circumstances was then accepted.

7. Conclusions

- 7.1 If approved, the attached consultative draft Historic Environment Strategy for Falkirk 2017 would go out to external consultation where we would welcome feedback from a range of partners, community groups and individuals. After the consultation, a report on the feedback received and a finalised draft would be reported back to the Executive for consideration and adoption.

List of Background Papers:

The following papers were relied on in the preparation of this report in terms of the Local Government (Scotland) Act 1973:

Our Future in the Past

Historic Environment Strategy for Falkirk 2017

Forward

from Councillor Mahoney

to be supplied later

‘We must remember that heritage isn’t just about buildings, archives and wildlife, important as these things are. It’s also about the people and communities whose lives they changed in the past - and will change in the future. It’s about the tourism and regeneration that will boost local economies, about the new jobs, the new training programmes and the new volunteering roles that will be created. It’s also about the visitors from all walks of life who will gain new insights into our shared heritage.’

Executive Summary

The Falkirk Council area has a dynamic and successful history, spanning from Roman occupation and territorial disputes with the English to becoming the engine room of Scotland's industrial might.

Our historic environment is a tangible legacy of this rich past, comprising a variety of historic assets, including part of a transnational world heritage site to a variety of listed buildings, scheduled monuments, archaeological treasures, historic landscapes and battlefields.

The previous Built Heritage Strategy, adopted in March 2006, recognised the benefits of conserving and protecting the local historic environment; a programme of actions was promoted which reflected outstanding commitments from the Council's Structure and Local Plans at that time. Although many proposed actions in the 2006 strategy have been achieved, the changed context, with its new opportunities and challenges, demands the refocussing of our priorities. Collaborative working with partners together with greater empowerment of our communities are suggested key delivery tools for this new strategy.

"Our Future in the Past" Historic Environment Strategy for Falkirk 2017 - 2022 will continue to deliver successful outcomes for the historic environment of the Falkirk Council area, by achieving the vision for 2034 as set out in the Local Development Plan 2015:

"Overall, our built heritage will be valued and promoted as an asset to a greater degree than at present. The Antonine Wall will be recognised as an exemplar of World Heritage Site management. Historic buildings at risk will have been sensitively restored and brought back into use. There will be wider recognition of the value of historic gardens and designed landscapes, and the area's battlefield sites."

The following themes have been identified which shape a series of proposed priority actions which are set out in the Action Plan; these themes are in part derived from key priorities set out in the Scottish Government's national strategy for the historic environment: Our Place in Time, The Historic Environment Strategy for Scotland 2014:

Effective Management and Protection

Enhancement of Knowledge

Knowledge Sharing

Increased Access

Sustainable Use of Assets

Growing Skills

Community Involvement

Increased Appreciation

Accordingly, this strategy provides an updated vision for the historic environment of the Falkirk Council area, supported by a framework of themes and priority actions for the promotion, management, appreciation, protection and better understanding of our historic sites and assets throughout the next five years and beyond.

The Pineapple

Muirhouses Conservation Area

1. Introduction

1.1 The Historic Environment of Falkirk

The Falkirk Council area is situated at the heart of Central Scotland and its road and rail network. While Falkirk constitutes the main centre for support services and administration, a network of towns and villages set within diverse landscapes provide distinctive places for the population of 158,460 (2015) to visit, live and work.

The Falkirk Council area has a unique historic environment, reflecting its long settlement history and its strategic location. It was a rich and important agricultural area, hosting the huge Tryst cattle market in former times; it was changed dramatically by the industrial revolution. The production of iron, which harnessed the power of the River Carron, started in 1760. The Forth and Clyde Canal constructed in the 1790's and the Union Canal dating from 1820's brought industry to the area.

As a result of this proud history, the local historic environment consists of a wide range of architectural, cultural, historic and archaeological assets and sites which provide us with some of our most distinctive and well - loved places; these historic assets contribute to the local economy and tourism.

The historic environment of Falkirk relates as much to the future of the Falkirk Council area as it does to its past. This strategy will ensure that the historic environment is embedded in corporate strategy as a catalyst for future growth and creation of successful places. We can stimulate better place making through encouraging development which is sympathetic to our historic environment and by properly looking after our historic assets and sites. Improved place making promotes inward investment and encourages greater economic activity. Falkirk's historic environment enriches the character and appearance of the area, and contributes to the current vision that national planning policy NPF3 and SPP have set out for Scotland as a place that is successful and sustainable, low carbon, naturally resilient and connected.

Given the current environment of reduced public funding and shrinking resources, partnership working with other organisations and the community will be required to achieve results. An holistic and collaborative approach to place making will be integral to future projects and initiatives that impact on the historic environment.

1.2 Statutory Designations

Many historic sites and assets benefit from statutory designation which protects Scotland's historic environment through planning legislation and process. Planning Authorities are required to consult Historic Environment Scotland on development proposals affecting historic sites with statutory designation. The national and local policy context is set out in detail in section 4.0.

Falkirk's statutorily designated sites are as follows:

1 World Heritage Site, The Antonine Wall, is part of the transnational Frontiers of the Roman Empire World Heritage Site. The Wall extends across Scotland for 37 miles, from Old Kilpatrick in West Dunbartonshire to Carriden in Bo'ness; it provides the largest and most important concentration of archaeological interest in the council area including sections of the wall itself, forts and camps.

89 Scheduled Monuments range from constituent and ancillary parts of the Antonine Wall such as ramparts, forts, fortlets and camps to domestic and defensive prehistoric sites, ecclesiastical sites, castles, dovecots and canals. After the Antonine Wall, the next most important archaeological sites are the Roman forts at Camelon and the associated temporary camps (one of the largest such concentrations in the world). The Forth and Clyde, and Union canals are important legacies of the area's industrial past. These were restored to navigation under the Millennium Link project.

352 listed buildings and structures include a rich mix of type and scale of structure including tenements, town and country villas, churches, bespoke public buildings, bridges, viaducts, aquaducts, farm houses and steadings, industrial workshops and harbours. There are 26 Category A Listed Buildings including landmark buildings such as the Pineapple, Dunmore, Blackness Castle, Callendar House and the Steeple, 196 Category B listed buildings and 130 Category C listed buildings.

9 conservation areas consist of the 2 town centres of Bo'ness and Falkirk, 2 Victorian town suburbs at Arnothill and Dollar Park and Grange and 5 estate and industrial villages at Airth, Allandale, Dunmore, Letham and Muirhouses.

3 Historic Gardens and Designed Landscapes are listed within The Inventory of Historic Gardens and

Blackness Castle

Callander Park

Designed Landscapes - Dunmore Park, which dates from the 1820s, The Pineapple, ornamental gardens and Callendar Park, which originated in medieval times as a deer park.

There are no designated Historic Marine Protected Areas within the Falkirk Council Area.

2 Battlefield Sites are listed within the Inventory of Historic Battlefields as nationally important battles - the Battle of Linlithgow Bridge, 4 September 1526 and the 2nd Battle of Falkirk, 17 January 1746.

Linlithgow Bridge is significant as it represents the largest attempt to free the young James V from the control of the Earl of Angus by military means. The site of the battlefield is reasonably well preserved despite modern day interventions such as a nature reserve and quarry.

The 2nd Battle of Falkirk is significant as the penultimate battle of the period of the Jacobite Risings. The Jacobite army at Falkirk was the largest ever assembled, and it was the first time in the '45 Rising that the Jacobites faced an experienced Government force in battle. It was the last time

Appreciating life as a Centurian Guard on the Antonine Wall

the Jacobites won a battle in pursuit of their long standing goal to restore the Stuart dynasty, although it failed in the end to improve their fortunes. Although eastern parts of the battlefield have been built over by modern development, much of the area remains as enclosed agricultural fields with localised woodland.

Forth and Clyde Canal, Lock 15

Avon Viaduct

Blackness Castle

1.3 Non - Statutory Designations

1.31 Areas of Townscape Value

There are various other areas of architectural, historic or townscape merit across the Council area which do not have conservation area status. Ranging from the mid 20th century garden city style settlement at Westquarter to Victorian and Edwardian districts in Falkirk, Grangemouth, Larbert and Polmont, these sites form coherent and interesting groups of buildings. In recognition of their significance, Falkirk Council Local Plan designated the following as Areas of Townscape Value:

- The Woodlands area of Falkirk
- Terraced Cottages in the Grahamston area
- Grahams Road frontages, Falkirk
- Sandstone properties south of the Town Centre in Bo'ness.
- Parts of Bridgeness, Bo'ness
- Parts of Bo'ness Road, Grangemouth
- Westquarter Village, "model" village
- Old Polmont
- Parts of Station Road, Polmont
- Parts of South Broomage, Larbert

1.32 Non - Inventory Designed Landscapes and Sites with Remnant Designed Landscape Features

In common with other authorities, the Falkirk Council area includes many historic gardens and landscapes that do not meet the standards required for inclusion in the national Inventory of Gardens and Designed Landscapes in Scotland. However, the following sites considered to be of local cultural and historic value are listed in the Supplementary Guidance document SG09 "Landscape Character Assessment and Landscape Designations as Non - Inventory Designed Landscapes and Sites with Remnant Designed Landscape Features within Falkirk Council Area. These are linked to Local Development Plan Policy D12 Historic Gardens and Designed Landscapes and are as follows:

Airth Castle	Balquhatstone
Avondale House	Bellsdyke Hospital
Avonhill	Camelon Cemetery

The Hippodrome, Bo'ness

Leisure and tourism on local canal network

Candie House	Manuel House
Carriden House	Millfield
Carron House	Muiravonside House
Carronvale House	Parkhill House/Gray-Buchanan Park
Castleary	Polmont Park/Polmont Bank
Darroch	Powfoulis
Denovan House	Quarter House
Dollar Park/Arnotdale House	Royal Scottish National Hospital
Dunipace House	South Bantaskine House
Glenbervie/Woodside/Torwood Castle	Southfield House
Glebe Park, Bo'ness	Summerford Park/Glenfuir
Gleneilrig	Vellore
Haining/Parkhall	Victoria Park, Bo'ness
Kinnaird House	Zetland Park, Grangemouth
Kinneil House/Estate	
Larbert House	
Lathallan/Laurence Park	

Salt pans are associated with Blackness, Bonhard Pans, Kinglass Pans, Grangepans, Bo'ness, Kinneil, Grangemouth and Dunmore.

diagrams and maps still to be inserted

Diagram 2 shows the location and images of a selection of listed buildings in the area.

Diagram 3 provides sketches and location of conservation areas.

Map A shows location of Battlefield Sites

Map B shows Sites within Inventory of Gardens and Designed Landscapes in Scotland

Map C shows location of Non - Inventory Designed Landscapes and Sites with Remnant Designed Landscapes Features within Falkirk Council Area

Map D shows location of Areas of Townscape Value.

Map E shows spread and location of Scheduled Monuments.

1.33 Sites and Monument Record

Sites of regional or local archaeological importance (SMR) are sites which are not recognised by inclusion in national lists but are considered to be locally significant and can be found on the Sites & Monuments Record, which is held at Callendar House. At December 2016, there were 2,821 entries. They range from doocots to canals (such as the Carron canal, the Bo'ness Canal, the Stirling Canal). It also includes the find spots of relics such as Bronze Age arrowheads, Roman coins, etc.

Local maritime archaeology is connected with harbour and port facilities such as at Airth where the whole dock and part of the pow were lined with oak planks in the 17/18th century. The site now lies inland, under a playing field and arable field. At Bo'ness the old harbour is also inland - under roads and recreational areas. The facilities at Grangemouth are industrial in scale and only date from 1770 onwards. The River Carron was a major point of access and the lower reaches have numerous wharfs.

2. Why is a new Strategy Required?

2.1 Making Better Places

The vision for this strategy is intrinsically linked to better place making see 8.0 Strategic Vision and Themes. Place making is at the heart of current national and local planning policy.

A key strategic objective of the Local Development Plan is “to improve the sense of place in our towns and villages and to protect, enhance and promote our historic environments”. It states that the current situation with respect to this aspect is that “The area looks and feels better than it did 15-20 years ago, and examples of good design are starting to shape a more positive image of the area. The level of vacant and derelict land has reduced substantially. The area has a wealth of historic environment assets, which is receiving more co-ordinated attention through the Built Heritage Strategy. The Antonine Wall has received World Heritage Site status. Conservation areas have been reappraised. However, a number of key historic buildings remain redundant and at risk”.

The LDP acknowledges that much of the Falkirk area’s sense of place derives from its historic environment, including a rich diversity of architectural, cultural, historic and archaeological assets. The LDP Spatial Strategy states that the focus in the Falkirk Council area for placemaking in the future will be the strategic growth areas and business locations, which present unique opportunities to influence the urban form at a strategic level, and other locations which are particularly crucial to the image and sense of place of the area. Town and village centres will continue to require reshaping and repair, whilst the quality of urban road corridors needs to be raised. The canal corridor is a key placemaking asset connecting communities across the area, whose full potential has still to be realised. The Central Scotland Green Network aims to build up the ‘green’ elements of place, enhancing river, road, open space and urban fringe corridors, and enhancing the setting of existing and new development. The historic environment adds diversity and interest to areas identified as local strategic priorities.

2.2 Changing Context

Falkirk Council benefits from an existing Built Heritage Strategy which was adopted in March 2006; at that time, it fulfilled commitments set out in the Falkirk Council Structure Plan and Local Plan. A key aim of the document was to develop a robust approach to the implementation of national and local planning policy for conservation and enhancement of local built heritage. Targeted actions addressing key issues were drawn up and prioritised.

Whilst a significant proportion of the proposed actions set out in the Built Heritage Strategy 2006 have been achieved as is set out in detail in 5.0 Achievements, the national and local context has altered with the passage of time with respect to a number of aspects including:

- The legal framework and statutory processes under which national organisations and local planning authorities operate has changed as a result of The Historic Environment Scotland Act 2014; one of the major moves was the merger of Historic Scotland and RCAHMS to form a non - departmental body, Historic Environment Scotland (HES) with charitable status. The Historic Environment Scotland Policy Statement: June 2016 was brought into force in June 2016, as a replacement for the Scottish Historic Environment Policy (SHEP 2011). The policy statement explains how HES implements its regulatory and advisory roles and sets out how planning authorities should interpret and implement national planning policy.

Letham Conservation Area

Falkirk High Street

Falkirk Trinity Church

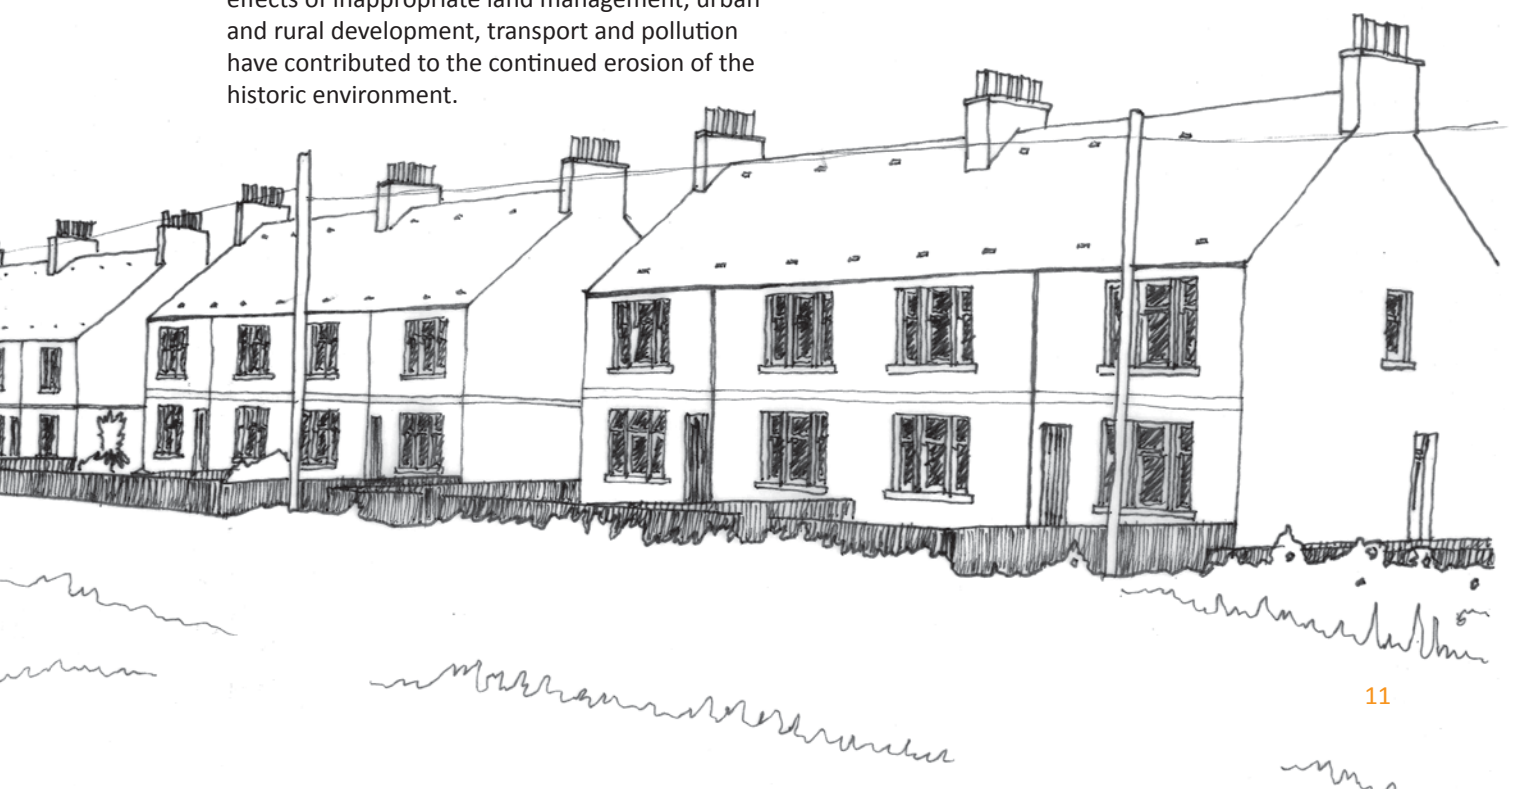

- Digital technology has advanced, enabling new forms of recording, access to and engagement with the historic environment; the opportunities available at a local level for interpretation, learning and access are discussed further in 6.3 Priority Actions. Scotland's Historic Environment Data Strategy (April 2014) sets out a vision for the sharing and linking of digital records on the historic environment between local and national bodies. A forum held in 2015 to take the strategy forward discussed the need for fast mobile access to linked data, as a way of avoiding searching across multiple sources. The need to standardise polygonisation across Scotland was also raised. Scotland-wide online coverage of HERs was suggested. With resourcing being constrained, the need for better communication, partnership working and supporting community engagement was identified. The opportunity to integrate historic environment data with other environment and property data 'platforms' was highlighted. A key strand running throughout the forum was the need to package data more effectively to meet the needs of both existing and potential users.
- Funding opportunities have expanded while demand has risen - for further information see 7.1 Funding Sources and 10.6
- The impacts of physical change on the historic environment have become a national issue. Climate change and other factors such as the effects of inappropriate land management, urban and rural development, transport and pollution have contributed to the continued erosion of the historic environment.

Kinneil Estate

“The challenge for sustainable management of the historic environment and how it contributes to the vitality of modern life, is to identify its key characteristics and to establish the boundaries within which change can continue so that it enhances rather than diminishes historic character”

Historic Environment Scotland
Policy Statement: June 2016.

3. Benefits of the Historic Environment

3.1 Well-being

It is widely acknowledged that the historic environment contributes to the general well-being of the Scottish nation. “Our Place in Time - The Historic Environment Strategy for Scotland”, published by The Scottish Government on 4 March 2014 sets out a ten year vision for the historic environment; one of its key aims is to ensure that the historic environment maintains a positive influence on the well-being of the nation. Refurbished and well-maintained buildings, streets and parks attract greater use and consequently suffer far less vandalism which improves community safety and reduces levels of crime.

The opportunities to enjoy heritage based walks within the Falkirk Area have never been better.¹⁰5 provides further information.

In the last 20 years, Falkirk Council and partners of The Central Scotland Forest Strategy and Falkirk Greenspace Initiative have secured significant improvements to outdoor access in the area through programmes of landscape enhancement, woodland creation, and habitat improvements. The Central Scotland Green Network, which has been identified as a national development in the National Planning Framework 3, plans to further transform the quality of the landscape across 19 local authorities with Falkirk Council at the heart of a green network. Sites of historic interest and significance are scattered widely across the green network.

3.2 Cultural identity

The historic environment is part of our cultural identity as a nation and community.

“In Scotland, the historic environment is estimated to contribute in excess of £2.3 billion (2.6%) to Scotland’s national gross value added (GVA) and to account for 2.5% of Scotland’s total employment, supporting 60,000 FTE employees which includes seasonal employment.”

“Our Place in Time
The Historic Environment
Strategy for Scotland.”

Decorative tablet on the facade at 185 - 189 High Street

Falkirk Town Centre includes a range of listed buildings of special architectural and historic merit

3.3 Economic benefit

Historic buildings and places bring significant economic benefits to Scotland as a whole and to the Falkirk Council area. Falkirk Council's economic strategy, "An Economic Strategy for Falkirk 2015-25" promises to build upon the established and growing tourism market to meet the aspirations of the local community, the businesses and public sector partners, which will consolidate a platform for further economic success.

In recent years, Falkirk's Historic Environment has attracted considerable external public funding through major heritage led regeneration projects; the Bo'ness Town Centre Townscape Heritage Initiative at Bo'ness (2003 - 2008) and Falkirk Town Centre Townscape Heritage Initiative (2013 - 2018) have been delivered directly by Falkirk Council, private businesses, individuals and community groups. Falkirk Council, Historic Environment Scotland (HES) and the Heritage Lottery Fund (HLF) are key investors. The economic as well as social and educational benefits brought to the local and wider area are discussed in more detail in 5.00 Achievements.

The Antonine Wall Socio - Economic Impact Study by Brookdale Consulting (March 2015), commissioned by the five local authority partners, highlighted that the economic impact of the Wall generated annual benefits of £3M when direct, indirect and induced effects were included. It was also estimated that future impacts could grow from the current level of £3m to £5m over 5 years with a cumulative impact of £21.7m over 5 years based on public sector spend of £3.2m.

An innovative assessment of the value of heritage based on a Treasury approved approach, (contingent valuation) established that residents, visitors and businesses attached an economic value of between £1.2 and £1.4 billion to Edinburgh World Heritage site. Local residents, visitors and businesses confirmed their support for the conservation of the city's heritage which they deemed to represent a good, long term legacy for future generations.

3.4 Tourism

The Scotland Visitor Survey, Visit Scotland, 2011/12 recorded that 43% of first time visitors to Scotland and 28% of all visits to Scotland were made "to learn more about the history/culture of Scotland".

Since 2009, the Falkirk Council Area has achieved a significant increase in tourism performance in terms of numbers of visitors and expenditure in the area. The internationally acclaimed attraction, The Kelpies, together with the more recent development of The Helix Park have contributed to improved visitor numbers at other local attractions such as The Falkirk Wheel. The Historic Environment of Falkirk provides a number of major visitor attractions such as The Antonine Wall, Callendar House, Blackness Castle, The Hippodrome and Bo'ness and Kinneil Railway, The Forth and Clyde Canal and The Union Canal. Improvements including restoration and the reinstatement of historic architectural features to buildings, streets and public open spaces within Bo'ness and Falkirk implemented through the Townscape Heritage Initiatives (THI's) attract visitors to the local area. Tourism Falkirk 2020, Falkirk Area Tourism Strategy 2015 - 2020, has identified sites with potential to extend visitor appeal including Callendar House and Park, Kinneil House and Estate, Falkirk and Bo'ness Town Centres and The Antonine Wall. Feasibility studies on the redevelopment of the Rosebank Distillery have been carried out which would transform this local landmark building at risk and which would provide a major visitor destination on the canal network and on the outskirts of Falkirk Town Centre. Transportation links and pathways to connect sites with town centres will be pivotal to economic regeneration of the area.

4. Policy Context

4.1 National Framework

One of the key aims of this strategy is to deliver the vision and aims of “Our Place in Time” The Historic Environment Strategy for Scotland 2014 at a local authority level.

The vision of the national strategy is: “Scotland’s historic environment is understood and valued, cared for and protected, enjoyed and enhanced. It is at the heart of a flourishing and sustainable Scotland and will be passed on with pride to benefit future generations.”

The aims of the national strategy are:

- Understanding - by investigating and recording our historic environment to continually develop our knowledge, understanding and interpretation of our past and looking at how best to conserve, sustain and present it.
- Protecting - by caring for and protecting the historic environment, ensuring that we can both enjoy and benefit from it and conserve and enhance it for the enjoyment and benefit of future generations.
- Valuing - by sharing and celebrating the richness and significance of our historic environment, enabling us to enjoy the fascinating and inspirational diversity of our heritage.

The vision above aligns with the 4 national planning aims which focus on a successful, sustainable place, a low carbon place, a natural resilient place and more connected place.

This strategy also reflects the general national and regional policy context which includes the following:

- Scotland’s Third National Planning Framework, 2014
- Scottish Planning Policy, 2014
- The Historic Environment Scotland Act, 2014
- The Historic Environment Scotland Policy Statement, June 2016
- “Our Place in Time” The Historic Environment Strategy for Scotland 2014

- Scotland’s Historic Environment Data Strategy, April 2014
- Historic Environment Circular1
- Historic Environment Scotland’s Managing Change Series of Guidance Notes
- Heritage Tourism, 2020
- Scottish Canals Heritage Strategy, 2013 - 2018
- The Antonine Wall Management Plan, 2014 - 2019
- Supplementary Planning Guidance Frontiers of the Roman Empire (Antonine Wall) World Heritage Site 2011. (SG07 Supplementary Guidance is under preparation)

“It is diverse, but collectively it tells the story of our shared past. It is important in its own terms, providing key evidence of the lives and creativity of our forebears. It also helps to create a sense of place, identity and physical and social well-being, and benefits the economy, civic participation, tourism and lifelong learning. It is dynamic and ever-changing and that dynamism lies at the heart of the need for sound principles of stewardship.”

“Our Place in Time”
The Historic Environment
Strategy for Scotland

Arnothill and Dollar Park Conservation Area

The Kelpies, Falkirk

4.2 Local Context

This strategy responds to the vision and strategic objectives of Falkirk Council’s Local Development Plan 2015 which in turn have been informed by the Strategic Outcomes and Local Delivery Plan.

The LDP Vision for the Falkirk area is: “A dynamic and distinctive area at the heart of Central Scotland, characterised by a network of thriving communities and greenspaces, and a vibrant and growing economy which is of strategic significance in the national context, providing an attractive and sustainable place in which to live, work, visit and invest.”

A key strategic objective of the Local Development Plan is “to improve the sense of place in our towns and villages and to protect, enhance and promote our historic environments”

This strategy also takes account of the associated local policy context which includes the following:

- An Economic Strategy for Falkirk 2015 - 25
- Strategic Outcomes and Local Delivery Plan 2016 - 2020
- One Council One Plan, Corporate Plan 2012 - 2017 Falkirk Council
- Supplementary Guidance SG04,SG07,SG09,SG16 Falkirk Council
- Falkirk Greenspace Strategy 2013 Falkirk Council
- Open Space Strategy and Park Development Plan Falkirk Council
- Falkirk Area Tourism Strategy 2015 - 2020 Falkirk Council
- Antonine Wall Management Plan 2014 - 2019
- Antonine Wall WHS Local Action Plan 2014 - 2019
- Culture and Sport Strategy 2014 - 2024 Falkirk Community Trust
- Heritage Delivery Plan 2015 - 2018 Falkirk Community Trust
- A Masterplan for Kinneil Estate July 2014: Falkirk Community Trust
- Callendar Park Management Plan 2015 - 2020 Falkirk Community Trust
- Consultative Draft Arts Plan 2016 - 2021 Falkirk Community Trust
- Business Plan 2015 - 2020 Falkirk Environment Trust

5. Achievements

5.1 Improved Sense of Place and Co-ordinated Attention to the Historic Environment

Falkirk Council's Local Development Plan states that the current, situation with respect to sense of place and historic environment is that "The area looks and feels better than it did 15-20 years ago, and examples of good design are starting to shape a more positive image of the area. The level of vacant and derelict land has reduced substantially. The area has a wealth of historic environment assets, which is receiving more co-ordinated attention through the Built Heritage Strategy. The Antonine Wall has received World Heritage Site status. Conservation areas have been reappraised. However, a number of key historic buildings remain redundant and at risk".

5.2 Townscape Heritage Initiatives

The Townscape Heritage Initiative programme is a national scheme through which The Heritage Lottery Fund (HLF) provides grants to help communities regenerate conservation areas displaying particular social and economic need. It encourages partnerships to carry out repairs and other works to historic properties within the THI area and improve the quality of life for all those who live, work or visit there. HLF expects schemes to deliver the following outcomes:

- Preserve and enhance the character and appearance of the conservation area that is in need of regeneration;
- Repair and reinstate authentic details and traditional materials;
- Bring historic buildings back into appropriate, sustainable and economic use;
- Increase training opportunities in heritage skills and wider community participation.

Conservation Area Regeneration Scheme (CARS)

This scheme provides financial assistance, over a five year period to support THI grants to businesses, tenants and residential owners of properties within the THI area. The aims of the Scheme complement those of the THI and include:

- Targetting vacant properties back into sustainable economic use;

- Creating new or improved shop fronts that reflect the town's heritage and conservation area status;
- Restoration of original architectural detail and re-introduction of traditional materials and designs for windows, gutters, roofs and stonework;
- Public realm improvements;
- Training initiatives and support for independent retailers.

Bo'ness Townscape Heritage Initiative

The Bo'ness Townscape Heritage Initiative (2003 - 2008) implemented a £5 million project for heritage-led economic regeneration of the town centre. The project, which was supported by Falkirk Council and other partners including Heritage Lottery Fund and Historic Environment Scotland through their CARS Scheme, brought new life and sustainable economic use to historic buildings within the town centre, including the Hippodrome cinema. The Hippodrome was re-opened in April 2009 and now shows a wide variety of films. Improvements were also made to town centre pavements, surfaces and kerbs in the main shopping areas.

5.3 The Falkirk Townscape Heritage Initiative

This project, which runs from 2013 to 2018, is jointly funded by the Heritage Lottery Fund (HLF), Historic Environment Scotland through their CARS Scheme, Falkirk Council, and the Falkirk Business Improvement District. Between 2013 and 2018 £5.5 million will have been invested in the town centre's unique and rich heritage. Under the auspices of this scheme, the historic town Steeple and numerous other key buildings in the area including Vicar Street, Cow Wynd have been repaired and restored; window, shop fronts and other traditional features in traditional buildings have been restored or reinstated to their original design and materials. The public realm has been improved and vacant historic floor space has been brought back into use. A programme of community engagement is being implemented which is helping school children, colleges and local people to learn more about their heritage; a training programme is also in place to facilitate job opportunities linked to the conservation of traditional buildings and historic environments. Full details of the THI training programmes from 2013 - 2018 are provided in 10.4.

Engaging with the local community and schools

School children deliver heritage art based on local buildings

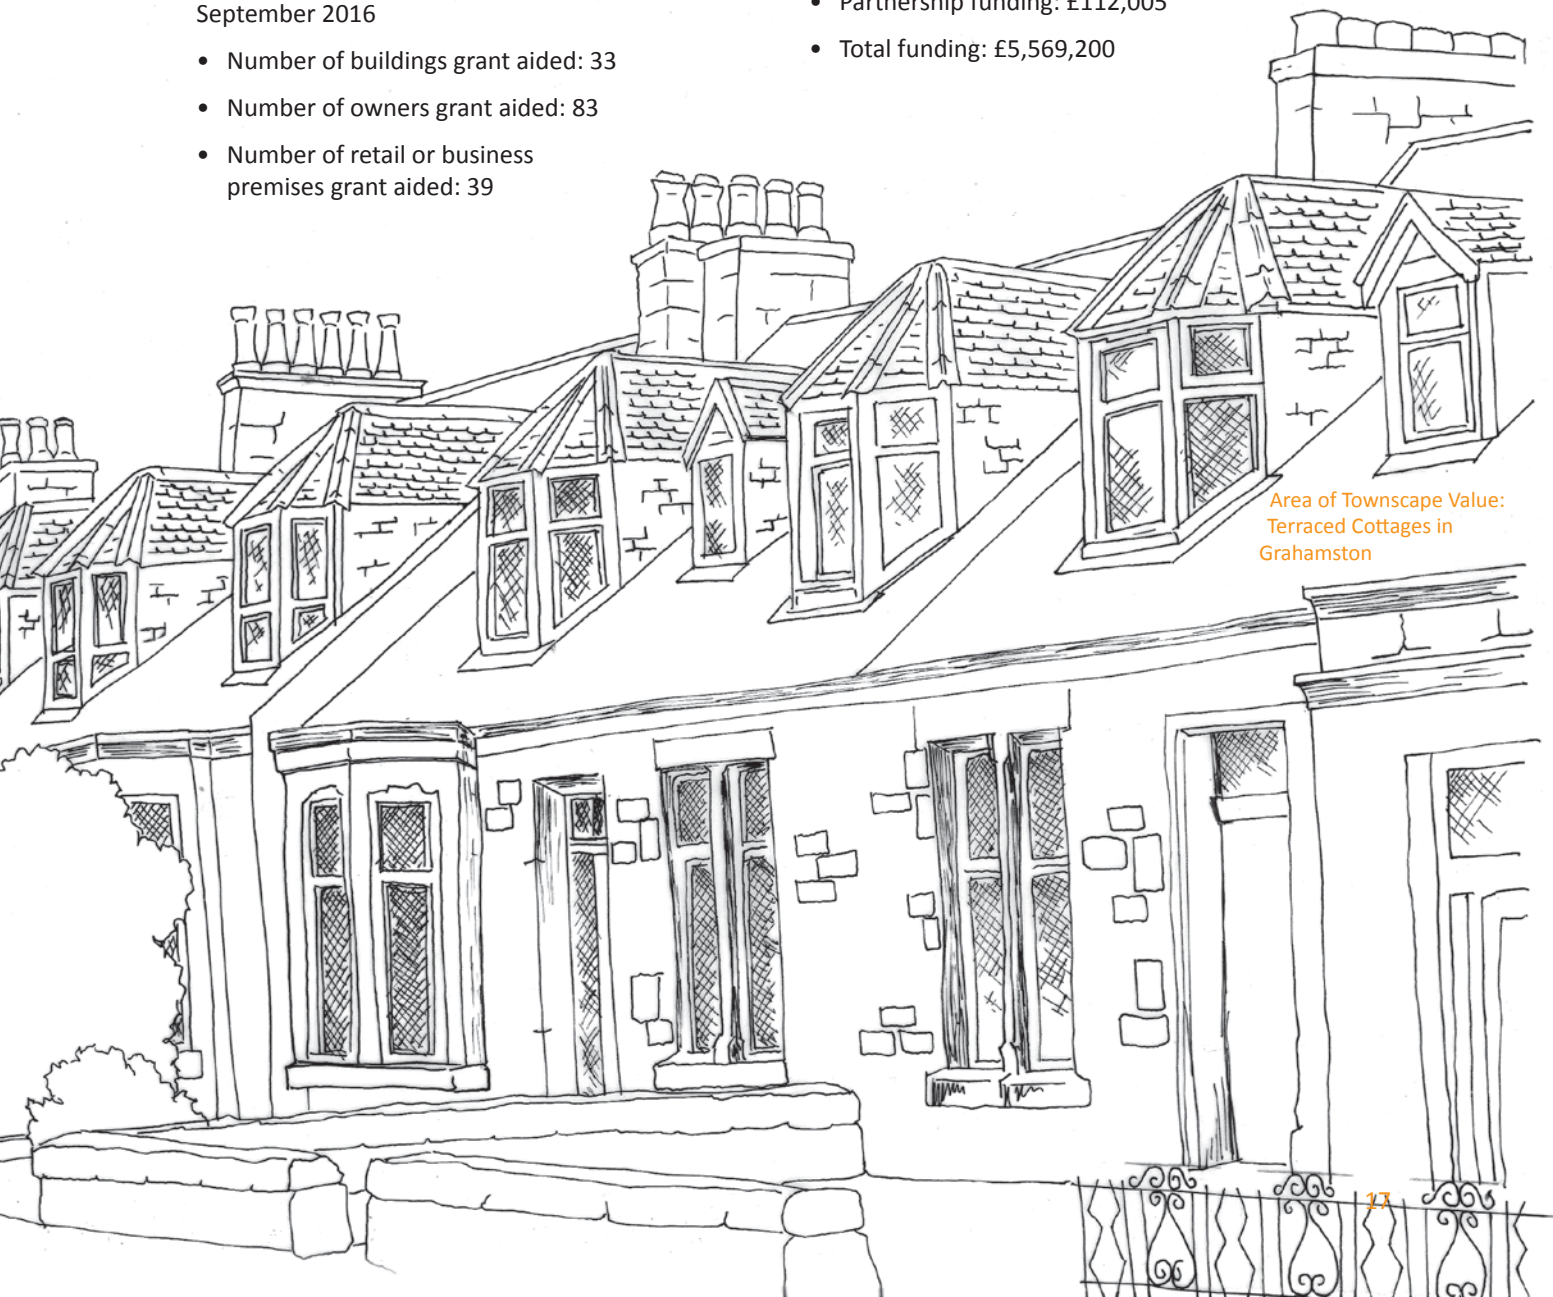

Historic townscape with decorative rooftop features including dormers and chimneys

The economic as well as social and educational benefits brought to the local and wider area, to date, by this scheme are demonstrated by table 1.

Info for table 1 is based on available data at September 2016

- Number of buildings grant aided: 33
- Number of owners grant aided: 83
- Number of retail or business premises grant aided: 39

- Number of residential properties developed from empty floorspace: 3
- Square metres of public realm to be improved: 6,527sqm
- Total spend on training and heritage engagement activities: £172,500
- Final financial information is not available at time of writing as the THI is still in progress but at the outset the following estimations were provided:
- Owners' contributions: £1,907,230
- HLF funding: £1,949,965
- HES funding: £1,600,000
- Partnership funding: £112,005
- Total funding: £5,569,200

Grahamston

Mercat Cross, Airth

The Falkirk Council Area features a range of historic domestic villas

5.4 Other Local Achievements

The local planning authority has fulfilled its responsibilities with respect to effecting positive management and positive change within the historic environment in the Falkirk council area by the following achievements:

- A programme of Conservation Area Appraisals for the council's nine conservation areas was completed in 2013. Conservation Area Appraisals provide information on the special historical, architectural, spatial and topographical features of each area.
- A programme of Conservation Area Management Plans was completed in 2013. Conservation Area Management Plans provide detailed guidance to property owners, occupiers and their agents on the local and national planning policies to be followed when making alterations to land and premises in the conservation area.
- New Article 4 Directions were approved by Scottish Ministers in 2013. Article 4 Directions bring additional planning control over development in the conservation areas carried out by local authorities and by statutory undertakers including Gas, Drainage, Water, Electricity and general service providers.
- A Building Stone and Slate Survey of Falkirk Centre was completed by the British Geological Survey in 2013 on behalf of the local planning authority. The survey provided critical information on the provenance and geological characteristics of traditional building materials in Falkirk Town Centre to inform effective development management of historic buildings.
- New Supplementary Guidance (SG16) on Listed Buildings and Unlisted Properties in Conservation areas was produced and adopted in 2016. Together with updated guidance on Shopfronts, SG04, these SG's on the historic environment add to a suite of 17 documents which seek to provide more detailed guidance on how local development plan policies should be applied in practice. An updated version of the existing SG07, Frontiers of the Roman Empire (Antonine Wall) World Heritage Site is planned for joint production and adoption by the five local authorities concerned. Consultation on SG07 is

dependent on timescales and co-ordination with the 5 other local authorities.

- Conservation Area Enhancement Projects have been implemented through partnership working with local communities and include improvements to the public realm at Muirhouses and Airth, a memorial cairn at Letham, walls, paths and railings at Allandale, traditionally styled notice boards and bus stops in several conservation areas and renovation work to the historic well in Dunmore.
- The fountain, war memorial and gates to Zetland Park have been formally recognised for their architectural and historic interest by being designated as listed buildings by HES in 2016.
- A series of heritage trails have been created in partnership with a range of organisations.

Achievements by partners working within the historic environment in the Falkirk Council area include:

- Scottish Canals have invested heavily in the infrastructure of historic canals over the last two decades; an £83 million restoration scheme was carried out from 1999 to 2002 on the Forth and Clyde and Union Canals, both of which are made up of listed buildings and scheduled monuments.
- Inauguration of the Forth Valley Traditional Building Forum in 2013 added to a growing network of local traditional building forums with representatives across the supply chain. The Forth Valley Forum includes representatives from the Falkirk, Stirling and Clackmannan Council areas as well as Loch Lomond and the Trossachs National Park; the purpose of the forum is to work together to raise the profile of specific issues relating to traditional buildings and building practices. Achievements include Scottish Apprenticeship Week Skills Demonstrations for schools and the public in Falkirk, Stirlingshire and Callander from 2014 to 2016
- The Callendar Park Management Plan 2015 – 2020 sets out aspirations for this key green space within the context of challenges which include reduced resources and an ageing infrastructure. Projects identified to meet the themes of Participation, Motivation, Venues and Partnership include changes to grassland, bedding and shrub management, improvements to signage, gateways and interpretation, changes to parking, play and

Restored village pump at the centre of Dunmore Conservation Area

Antonine Wall ditch at Watling Lodge

activity, park furniture, paths and toilets, updated management regimes for the woodland arboretum and the George Forrest Collection, development of park buildings and park events to increase usage.

- A Masterplan for Kinneil Estate, produced in 2014 by Falkirk Community Trust, provides a ten year plan for the conservation, enhancement and development of the estate. This document highlights the need for change to address the changing role of parks and proposes a range of projects to improve visitor experience and interpretation.
- The Friends of Kinneil won a 2016 Scottish Heritage Angels Award in the Sharing and Celebrating category for their volunteer-led projects promoting local history, architecture and archaeology.
- The Friends of Kinneil arranged an event in the Scottish Parliament celebrating 250 years of James Watt's condensing steam engine and Big Roman Week which promoted the Antonine Wall World Heritage Site.
- Falkirk Community Trust introduced energy saving infrastructure to the category A listed Callander House via a district heating plant linked to adjoining housing

5.5 Antonine Wall Frontiers of the Roman Empire World Heritage Site

The inscription of the Antonine Wall in 2008 marked increasing recognition of the extent and significance of the Frontiers of the Roman Empire World Heritage Site (FREWHS). The FREWHS is a serial transnational World Heritage Site currently comprising Hadrian's Wall (inscribed in 1987), the German Limes (inscribed in 2005) and the Antonine Wall. In Scotland, Falkirk Council belongs to a partnership of key local authorities and government agencies who deliver strategic and operational functions specifically for the Antonine Wall. The other partners are East Dunbartonshire Council, Glasgow City Council Historic Environment Scotland (HES), North Lanarkshire Council and West Dunbartonshire Council. The Antonine Wall Management Plan 2014 -19 provides a broad framework for the management, conservation and enhancement of the Antonine Wall. The Management Plan is accompanied and supported by a five-year Action Plan. This captures and prioritises key actions for the partners and wider stakeholders and sustainably builds both infrastructure and public engagement. As well as focusing on practical work such as interpretive panels, road signage and paths to specific sites, it also includes actions to improve partnership working internationally and to achieve best practice approaches to site monitoring and management.

A programme of community projects, entitled Rediscovering the Antonine Wall, is being planned for 2018 - 2021 by the five partner authorities to help people discover and enjoy the Antonine Wall. A bid will be submitted to HLF for the programme which includes a community produced film showing changes in the wall since 1960, 5 replica stone distance markers like Bridgeness Slab, community curated exhibitions, arts projects and events, outdoor interpretation features making use of play and technology, outreach programmes to be taken to hub museums across Scotland, large scale public celebration and schools resource packs to support cross - curricular learning.

6. Challenges

6.1 Shrinking Resources

While the value of Falkirk's historic environment is being increasingly acknowledged, there is increasing competition for the resources required to maintain and enhance our historic places and buildings.

Constraints on public finance and the slowing down of growth and recovery in some sectors in the post - recession era present difficult challenges to overcome. The reduction in monies allocated by central government to grant giving bodies such as Historic Environment Scotland means that organisations often struggle to get heritage projects off the ground. Smart, imaginative cross - funding has become a common feature of successful heritage projects such as the Bo'ness and Falkirk Townscape Heritage Initiatives discussed previously. Partnership working on a number of potential projects could mitigate resource limitations within individual organisations and could offer further opportunities for cross funding as suggested in 8.3 Priority Actions.

6.2 Deteriorating Condition and Erosion

A wide variety of both publicly and privately owned buildings feature in the national register of Buildings at Risk, reflecting the spread and scale of the issue. While there were 2503 historic buildings in Scotland recorded as being at risk on the register at December 2016, within the Falkirk Council boundary, 28 buildings at risk were recorded, ranging in type and scale from a doocot to large country mansions. Diagram 4 - **to be inserted** - illustrates the variety and numbers of buildings at risk within the Falkirk Council area. See 8.3 Priority Actions for information on a proposed local Buildings at Risk Action Plan.

Historic gardens and landscapes are gradually being eroded due to a number of factors including lack of awareness and modern developments, which often take the form of enabling development; this type of development aims to address the conservation deficit which is an unfortunate feature in many larger heritage - led regeneration projects. See 8.3 Priority Actions for details of the Glorious Gardens project on historic landscapes within the Falkirk Council area.

The Scottish Government estimates that £600 million is spent on pre- 1919 buildings each year but the Scottish Housing Condition Survey highlights that 72% are not wind and watertight and this has

shown little improvement over the years despite significant private investment. Accordingly, the condition of pre - 1919 buildings in towns and villages throughout Scotland is a growing concern. However, new initiatives have been developed over the past 20 years to address the lack of awareness and the knowledge gap. Events have been held in towns and cities to demonstrate traditional building skills to key influencers in young people's career choices but also to raise awareness of the need to properly repair and maintain historic, traditional buildings using appropriate materials and skills. In the Falkirk, Stirling, Clackmannan Council Areas and Loch Lomond and the Trossachs National Park, the Forth Valley Traditional Building Forum, inaugurated in 2013, has arranged several events for school pupils and members of the public to raise the profile of traditional building skills as a rewarding career choice. Another key success is the ongoing The Falkirk Townscape Heritage Initiative which has been delivering a community engagement programme and training seminars. See Section 10.4 Falkirk THI Community Engagement Programme 2013 - 2018 and Seminar Programme 2016 - 2017

Inappropriate repairs contribute to current problems; damage from previous air pollution can be exacerbated by the presence of cement-based repairs ('plastic repairs') which have trapped or focussed moisture in the stone, leading to accelerated decay. In a number of buildings, stone cleaning has resulted in the loss of the stable outer surface of the stone exposing a weakened underlying zone which is more prone to erosion. Discolouration of blonde sandstone resulting from chemical stone cleaning is another common issue with the normally uniform pale colour becoming a variable orange and brown colour or bleached to a dull grey.

The use of inappropriate materials for repairs to historic structures can cause more than superficial damage. For example, inaccurate stone replacement to an historic façade stonework can lead to further damage and increase the need for more repairs.

The economic case needs to be made that prevention now will be a fraction of the cost of repairs in the future, resulting in considerable financial savings. Further knowledge transfer and awareness raising initiatives will be developed - see 8.3 Priority Actions.

Allandale Conservation Area

Callander House

6.3 Energy Efficiency

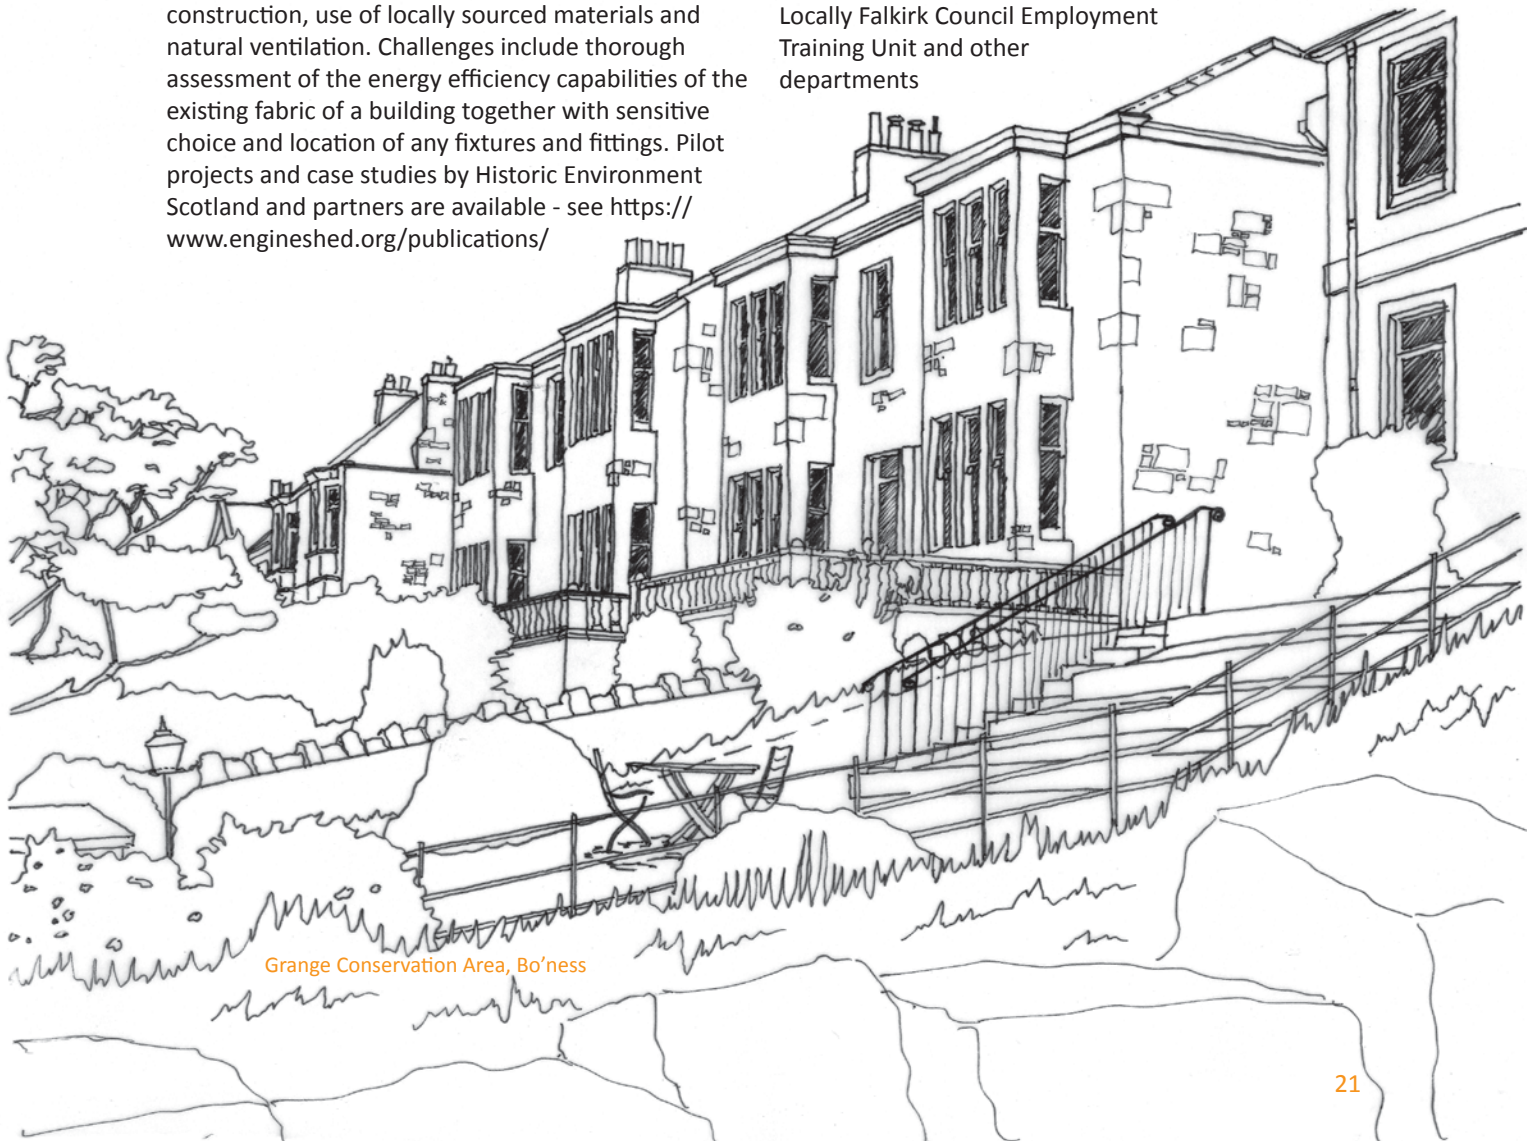

To be effective and sustainable in the modern world, traditional buildings must achieve energy efficiencies and carbon reductions. Scotland is committed to ambitious carbon reductions under The Climate Change (Scotland) Act 2009. The reduction of emissions from domestic energy consumption is key to meeting targets. Scotland has around 400,000 pre-1919 buildings, representing around 20% of the total building stock, approximately 47,000 of which are listed buildings. Research and practical trials by Historic Environment Scotland, have demonstrated that fabric improvements can be carried out to historic buildings without the wholesale loss of original building fabric and without the introduction of materials which erode the special character of appearance of the building. By their nature, historic buildings have benefits in terms of environmental sustainability, including their longevity, thermal mass construction, use of locally sourced materials and natural ventilation. Challenges include thorough assessment of the energy efficiency capabilities of the existing fabric of a building together with sensitive choice and location of any fixtures and fittings. Pilot projects and case studies by Historic Environment Scotland and partners are available - see <https://www.engineshed.org/publications/>

6.4 Shortage of Traditional Building Skills and Materials

The shortage of traditional skills and materials is acknowledged to be a national problem.

Surveys carried out within the last ten years to assess the level of available traditional building skills against current and estimated demand, include Safeguarding Glasgow's Stone Built Heritage Skills and Materials Requirements: Façade Surveys and Building Stone Analysis: A Report commissioned by the Scottish Stone Liaison Group April 2006. This survey established serious shortfalls in suitable qualified crafts persons and local materials for the maintenance and repair of the historic environment.

Historic Environment Scotland and the Construction Industry Training Board (CITB) have been working in partnership to improve education provision to meet the shortfall in traditional skills. Locally Falkirk Council Employment Training Unit and other departments

Grange Conservation Area, Bo'ness

School children enjoying hands - on experience of traditional building skills and materials

Historic Environment Scotland craftspersons share their skills with local school children

within Falkirk Council, Forth Valley College and Falkirk Townscape Heritage Initiative are working together to improve regional skills and employment opportunities.

A desk top assessment of building stone quarries in the central belt of Scotland carried out as part of a study of building stone and roofing slate in the Falkirk area by British Geological Survey for the planning authority in Falkirk Council in 2013, identified that there had been 66 quarries in central Scotland, providing local building stone from the mid to late 18th century. Production ceased by early 20th century and since then many of the quarries have been infilled or flooded. The study identified that six types of blonde sandstone and four types of red sandstone future would be required for future repairs. Not all the required stone can be obtained from the current quarry output in the UK, both in terms of volumes of stone and stone types. Further research would be required to establish the potential for re - opening of local quarries.

6.5 Climate Change

Predictions of climate change suggest that rainfall levels may significantly increase in parts of Scotland over this century, placing more pressure on the historic environment and increasing the chances of damage to fabric.

Damage to stone masonry due to water penetration is a significant cause of stone decay. In many cases this could be avoided if appropriate maintenance was carried out, particularly in relation to rainwater protection (e.g. gutters and downpipes) and pointing of masonry joints using an appropriate mortar.

Falkirk Council's Economic Strategy, "An Economic Strategy for Falkirk 2015 – 25", acknowledges the need to find alternative means of powering our towns and cities; it sets out the ambition to make Falkirk a prime location for sustainability and innovation in energy.

Quarries in the Falkirk area that have produced sandstone building stone

“Networked heritage means having sufficient connections in a place for heritage to be understood as and treated as a common public resource - drawn upon and enhanced by the full diversity of citizens and organisations. The role of the heritage sector will still include facilitating access to heritage assets, but it is by enabling others to integrate heritage into their thinking and their actions that networked heritage can have a transformative impact on people and places, helping communities create heritage for themselves.”

Royal Society for the Encouragement of Arts, Manufactures and Commerce Paper, Networked Heritage.

7. Opportunities

7.1 Funding Sources

Funding sources for projects relating to all aspects of the historic environment from parks and landscapes to oral history are available from a number of national and local organisations. The Heritage Lottery Fund is the largest dedicated funder of heritage in Great Britain, having awarded £7.1billion to over 40,000 projects since 1994. A range of different grant programmes are available from £3,000 to over £5million. Applications for project funding are assessed against achievable outcomes for heritage, people and communities.

Historic Environment Scotland offers a range of funding schemes from repair grants for buildings and places of worship to event funding, core support for organisations, support for regeneration and conservation initiatives over a five-year period known as Conservation Area Regeneration Schemes (CARS) to archaeological research work, thatched building repairs, grants for ancient monuments, maintenance plans, landscape management and centenary memorials restoration fund. Falkirk Environment Trust is a local charitable trust which aims to support environmental projects by awarding grants and supplying advice and guidance.

See Appendix 10.6
Funding Sources
for further information.

7.2 Heritage Network

The Royal Society for the Encouragement of Arts, Manufactures and Commerce suggests that a heritage network of large and small organisations would empower communities to step up as producers, participants and co-commissioners in managing and using heritage. Connections between local groups and more centralised organisations will create the opportunity for co-ordinated action.

“We are speaking up for the value of heritage to modern life, and developing approaches and programmes that make a real difference for heritage and people.”

Carole Souter, HLF Chief Executive

Dunmore Conservation Area

8. Strategic Vision and Themes

8.1 Vision for Historic Environment of Falkirk

Falkirk Council's vision for the area in 2034, relative to place making and the historic environment is set out in the Local Development Plan:

“High quality design will be the norm, rather than the exception, and will be exemplified within the strategic growth areas, our town and village centres, our conservation areas, the approaches to our towns and the canal corridor. Overall, our built heritage will be valued and promoted as an asset to a greater degree than at present. The Antonine Wall will be recognised as an exemplar of World Heritage Site management. Historic buildings at risk will have been sensitively restored and brought back into use. There will be wider recognition of the value of historic gardens and designed landscapes, and the area's battlefield sites.”

8.2 Themes

To achieve this vision, a series of themes have been identified which are linked to the key principles behind the national strategy:

Theme	Key Principle of National Strategy
Effective Management & Protection	Protect - Care and Protect
Enhancement of Knowledge	Understand - Investigate and Record
Knowledge Sharing	Understand - Investigate and Record
Increased Access	Value - Share and Celebrate
Sustainable Use of Assets	Protect - Care and Protect
Growing Skills	Value - Share and Celebrate
Community Involvement	Value - Share and Celebrate
Increased Appreciation	Value - Share and Celebrate

8.3 Priority Actions

Effective Management and Protection

8.3.1 We shall continue to review and update as required local planning policies as set out in the Local

Development Plan and associated supplementary guidance on the historic environment including the Antonine Wall, scheduled monuments, listed buildings, conservation areas, areas of townscape value, historic gardens and designed landscapes and battlefield sites to ensure that our historic environment is legally and appropriately protected.

8.3.2 We shall review and update as required existing planning guidance on the historic environment to support national and local planning policies including conservation area appraisals and conservation area management plans.

8.3.3 We shall draw up a programme for the implementation of Character Appraisals of Areas of Townscape Value which aligns with strategic priorities as set out in the Local Development Plan. The programme will prioritise town centres first and other key target areas. Initially a brief appraisal of each existing area of townscape value will be carried out and an outline character statement produced. This exercise may screen out some areas out if it is considered that they do not merit a fully detailed character appraisal, in which case the option to de - designate an Area of Townscape Value will be investigated. Full character appraisals on other areas will follow with a view to assessing their potential as new conservation areas. The proposed designation of a conservation area requires requires public consultation, committee approval and adoption. Suggested linked actions include the possible production of new supplementary guidance on Areas of Townscape Value and incorporation of information on the character of areas into suggested place statements for each community. Place statements are proposed as an action towards Making Better Places in the Main Issues Report for the new Local Development Plan. Place statements could be a material consideration in the determination of planning applications and they could inform future briefs and masterplans for development sites.

8.3.4 We shall work with key partners such as local education providers, Historic Environment Scotland, Scottish Canals and Forth Valley Traditional Building Forum to promote proper maintenance of historic buildings, structures and sites and to disseminate knowledge and skills relating to the care and preservation of historic assets through a combination of seminars, events, skills demonstrations,

educational and other projects as identified through joint discussion.

8.3.5 We shall support the Falkirk Delivers Business Improvement District team in their potential involvement in the delivery of a Town Centre Factoring contract for communally owned properties within Falkirk town centre. Professional factoring services will help to maintain communally owned properties that have benefitted from grant aided refurbishment work through the Townscape Heritage Initiative and will assist other communally owned properties in everyday management and maintenance.

8.3.6 We shall review the need for Areas of Special Advertisement Control for the Falkirk and Bo'ness town centre areas; these controls are aimed at simplifying processes in relation to the implementation by planning authority of enforcement and other statutory actions.

8.3.7 We shall explore funding opportunities with partner organisations and communities for improvement projects varying in scale from small work such as repair and replacement of original historic building features and details to area based regeneration schemes such as Conservation Area Regeneration Schemes to maintain the momentum created by townscape heritage initiatives and

community led conservation area improvement projects.

8.3.8 We shall evaluate the potential for the existing Steering Group for the Falkirk Town Centre Townscape Heritage Initiative to continue under a new remit and name after completion of the THI Scheme to take forward and promote proper maintenance and repair of buildings and open space within the town centre of Falkirk and possibly including Bo'ness.

8.3.9 Following research into successful practice and processes, we shall devise a local Buildings at Risk Action Plan for consultation and approval.

8.3.10 In taking forward critical actions from this strategy, we shall agree joint priorities with key partners including Falkirk Community Trust and other stakeholders. Falkirk Community Trust plays a significant role with respect to place making and contributing to the economic development of the Falkirk area through its delivery of heritage engagement activity and management of heritage assets such as Callendar House and Park, Kinneil Estate and The Hippodrome. FCT manages Falkirk Council's archive and museum collections, maintains the Historic Environment Record and provides archaeological advice to the planning process.

Trinity Church, Falkirk

Historic Wynds in Falkirk Town Centre

Enhancement of Knowledge

8.3.11 We shall explore the options for developing knowledge and applying new technology and techniques by working in partnership with others. Potential projects include:

(a) - Joint working with Historic Environment Scotland, providers of a new post graduate course: Advanced Professional Diploma in Technical Building Conservation. Preliminary discussions have highlighted the potential opportunity for Buildings at Risk in the Falkirk Council area to be the subject of student feasibility projects as part of their course work. Potential buildings will need to be accessible and quirky with easy and safe access for site surveys. Students will be expected to carry out condition surveys, analyse, research and consult community groups on proposals for alternative uses and fabric repairs. Information procured through this exercise could be disseminated as new knowledge and could be used by the planning authority to encourage sustainable development in historic buildings that the commercial developers may consider to be unviable. Further discussions with HES will be required around Autumn 2017.

(b) - We shall investigate partnership working with key partners including HES and Forth Valley College on the laser scanning of significant local historic sites as a means of joint learning for students and data sharing; emerging data could be used by stakeholders of the local historic environment to raise awareness and understanding of historic sites and to promote local tourism.

(d) - We shall investigate new ways of researching and recording our historic environment with partner organisations, education providers and with volunteers groups. Condition surveys of Scheduled Ancient Monuments by HES field officers, conducted on a 5 yearly cycle, could be shared with Falkirk Council. Means of procuring and implementing condition surveys of the council area's 352 listed buildings and structures in the Falkirk Council Area will be explored. Potential for Architectural Conservation / Urban Design post graduate students to conduct survey work on historic buildings as part of their coursework will be investigated with Scottish Universities.

(e) - We shall explore working with partner organisations who have resources to record

archaeological sites, historic gardens and landscapes, battlefields.

Knowledge Sharing

A key aim of this strategy is to mainstream the historic environment across all departments of Falkirk Council so it is taken account of in all corporate strategies and future planning. We shall consider various means of achieving this aim including promotional workshops to other council departments, local partner organisations and to local communities.

8.3.12 We shall work with relevant local and national partners to ensure that information on the historic environment is updated and made accessible to everyone; information sources include HES designations database, the local archives collection and the sites and monuments record maintained by Falkirk Community Trust.

8.3.13 We shall pursue the production of a Falkirk Council hosted and managed, on - line register of local historic assets including listed buildings, list of addresses of properties in conservation areas, list of scheduled monuments, lists of inventory and non - inventory historic gardens and designed landscapes with locational data and other associated information such as that procured through the Glorious Gardens project.

8.3.14 We shall investigate with relevant partners the integration of local records with the proposed Scotland's Historic Environment Data System as set out in Scotland's Historic Environment Data Strategy, April 2014.

8.3.15 We shall encourage and support communities in the development and implementation of knowledge capture projects such as Scotland's Urban Past, which is a five-year nationwide project about the history of Scotland's towns and cities, led by Historic Environment Scotland and supported by the Heritage Lottery Fund.

Increased Access

8.3.16 We shall encourage communities to access and find uses for historic assets and we shall support initiatives by other council departments and external organisations for tourism and cultural uses for historic buildings and sites. Opportunities to explore include

“The Historic Environment is a key aspect of the Scottish tourism industry.”

“Our Place in Time”

The Historic Environment Strategy for Scotland 2014

Falkirk Rocks Festival, Funny in Falkirk, Roman Week, local folk festivals and drama performances.

8.3.17 We shall promote the development of new heritage and landscape trails in the local area in conjunction with local communities and external partners. Included in a series of proposed projects are the Falkirk Battlefield Train in conjunction with the 1745 Association, Scottish Battlefields Trust, Callendar Estate and Falkirk Community Trust and an Antonine Wall trail within the Falkirk Council area. Potential trails based around the history of the Carron Iron Company, the town of Bo'ness and the town of Grangemouth will be explored.

Sustainable Use of Assets

8.3.18 We shall support Scottish Canals in the potential redevelopment of Rosebank Distillery as an example of local industrial heritage reinvigorated in a key landmark building.

8.3.19 We shall investigate the potential for joint working with Scottish Canals and FVC on funding bids for restoration of Dollar Park which is close to Rosebank Distillery.

8.3.20 We shall submit a bid for £2.5M from Heritage Lottery Fund for the restoration and repair of historic features within historic Zetland Park in Grangemouth; works proposed include restoration of the cenotaph and public realm, feature lighting to illuminate cenotaph, refurbishment of the fountain including reinstatement of missing components and restoration and relocation of Grangemouth Old Town Clock.

8.3.21 We shall support Falkirk Community Trust in exploring and developing sustainable new uses within the Walled Garden in Kinneil Estate; suggested uses include small scale businesses such as bio - char manufacture and allotments.

Growing Skills

8.3.22 We shall continue to support the work of Scotland's Garden and Landscape Heritage in their Glorious Gardens Project, a pilot project over three years to record local and regionally significant non - inventory designed landscapes in the Falkirk Council and Clyde and Avon Valley Landscape Partnership areas. This project has been designed to grow knowledge and skills for volunteers; it will also increase appreciation of their local historic

environment. Skills developed through this project include the identification, research, survey, manual and electronic recording of data, interpretation and evaluation of historic gardens and landscapes. Working in partnership with a contractor, Northlight Heritage, this project has benefitted from in kind support from Falkirk Council and funding from HLF through the Clyde and Avon Valley Landscape. One of the aims of this project is to devise a flexible method for recording historic gardens and landscapes which can be applied in other areas to increase knowledge in some cases, initiate consideration for conservation and /or statutory designation. The data procured will be made available to the public via CANMORE, the online catalogue for Scotland's archaeology, buildings, industrial and maritime heritage. A bid has been submitted for grant funding from Historic Environment Scotland to complete work in the Clyde and Avon Valley Landscape Area in 2017 -2018 and in the Falkirk Area in 2018 - 19. If funding is secured, we shall convene further discussion with the Glorious Gardens project leader on the possible development of a conservation strategy for historic gardens and designed landscapes in the Falkirk Council area, which will include a conservation guide for landowners.

8.3.23 We shall continue to conduct knowledge transfer and skills raising sessions on all aspects of the historic environment with planning officers and other disciplines as is considered appropriate through in house seminars and talks by external specialists from time to time.

Community Involvement

8.3.24 We shall pursue greater engagement with local heritage groups and local communities; potential opportunities include on - line questionnaires and charrettes on place statements for the new local development plan and workshop sessions with community groups to increase awareness of this strategy.

8.3.25 We shall consult communities on the Buildings at Risk Action Plan to gather local support for the re - use of redundant and vacant historic buildings at risk in their area; we shall encourage local groups and others who are interested in developing proposals and we shall direct them to fund raising resources and to sources for specialist assistance on feasibility schemes.

Falkirk Town Centre

Cow Wynd, Falkirk

Increased Appreciation

The national series of focus years such as The Year of Architecture, Innovation and Design 2016, The Year of History Heritage and Archaeology 2017 and recurring events such as Doors Open Days, Scottish Apprenticeship Week, promote and instigate activity by communities involved with all aspects of the historic environment.

8.3.26 We will explore joint objectives with partners to enable local communities to celebrate every facet of the historic environment that fits with local and national objectives.

Falkirk Community Trust has developed a series of events, programmes and activities for 2017 - Year of History, Heritage and Archaeology - based on 3 key themes: The Romans (in recognition of the extensive presence of the Antonine Wall in our area), Industry (to mark the rise and decline of local industry) and The Horse (marking the dependency of mankind to the horse as acknowledged by the area's iconic Kelpie's sculptures). Horse themes activities under consideration include a large scale event focusing on horsepower at Helix Park, home of The Kelpies, equestrian themed exhibition, a film, commemorative pavement slabs and library displays. Roman themed activities suggested include exhibitions in Callendar House, digital storytelling workshops, event for World Heritage Day in association with Dig It and a joint project with Parks, Libraries and Heritage to build the Antonine Wall out of books. Activities celebrating the legacy of the local iron industry include a film, an exhibition, possible joint project with Historic Environment at the new Engine Shed in Stirling and restoration of Carron memorials in Larbert Churchyard.

Other Falkirk Community Trust activities include a public consultation on the future use of the refurbished Falkirk Steeple, promoting the Jacobite connection with Callendar House and ancestral tourism.

Glebe Street, Falkirk

8.3.27 We shall seek out partners such as the local Stirling Chapter of the Royal Incorporation of Architects in Scotland, the Central chapter of the Royal Town Planning Institute and Falkirk Delivers for the development of local award schemes which celebrate and raise awareness of the value of the historic environment. Falkirk Delivers BID promotes responsible development through their Taking a Pride Initiative. Suggested awards include best practice in the conservation and repair of historic buildings, best practice in the conservation and repair of shopfronts or other minor works, and best creative re - use and adaptation of historic buildings - the last being bi - annual only. An annual awards ceremony could be promoted on line and in local media to raise community awareness of the value of preservation and enhancement of historic environment.

8.3.28 We shall support Forth Valley Traditional Building Forum with their proposed future programme for local secondary schools on historic buildings, traditional building skills and materials including skills demonstration events and Summer Schools.

8.4 Action Plan

Ref	Theme	Action/Project	Lead	Partners	2017	2018	2019	2020	2021
8.3.1	Effective Management and Protection	Review and update planning policies and guidance	PEU, Falkirk Council						
8.3.2	Effective Management and Protection	Review and update Conservation Area Appraisals and CAMPS if required	PEU, Falkirk Council						
8.3.3	Effective Management and Protection	Programme of Character Appraisals of Areas of Townscape Value	PEU, Falkirk Council						
8.3.4	Effective Management and Protection	Disseminate knowledge of and promote maintenance	FVTBF, Falkirk Townscape Heritage Initiative	HES, Scottish Canals, FVTBF, FCT					
8.3.5	Effective Management and Protection	Promote factoring of communal properties	Falkirk Delivers, BID	PEU, Falkirk Council

8.3.28	Increased Appreciation	Support focussed programmes for secondary schools	Forth Valley Traditional Building Forum	PEU, Falkirk Council, Forth Valley College					

9. Monitoring Performance

9.1 Measuring Success

A national model for measuring success is under development. The national strategy suggests that successful delivery of its vision and key aims relies on collaborative working and making the most efficient use of resources. Monitoring and measuring success for this local strategy will rely on assistance and in some cases leadership from partners.

The Built Environment Forum Scotland (BEFS) has been working with stakeholders to develop a Performance Measurement Framework (Framework) to inform the delivery of the national strategy. Results are set out in Our Place in Time: Measuring Success Analysis of consultation responses and recommended next steps Final Report 13/02/15

Historic Environment Strategy for Falkirk Outcome:

The historic environment of the Falkirk Area is protected and safeguarded for the long term; its contribution to better place making is recognised and valued.

How this will be measured: number of demolitions of listed buildings and scheduled monuments, number of approved developments affecting the Antonine Wall, Battlefields, Inventory and Non - Inventory Designed Landscapes and Sites with Remnant Designed Landscape Features, number of buildings at risk rescued and brought into use, number of enforcement actions affecting the historic environment, number of planning applications for sustainable use of listed buildings and unlisted buildings in conservation areas. The programme of Character Appraisals for Areas of Townscape Value is progressing in accordance with programme. A Buildings at Risk Action Plan is developed, approved and adopted.

Historic Environment Strategy for Falkirk Outcome:

The application of new technology and techniques to survey and record historic assets are understood and available.

How this will be measured: Number of opportunities explored for the application of new techniques and new technology in partnership with external agencies and education providers.

Historic Environment Strategy for Falkirk Outcome:

The range, quality and quantity of easily accessible information on the historic environment in the Falkirk area has improved. Local records align with aims and

principles of national records as set out in Scotland's Historic Environment Data Strategy, April 2014.

How this will be measured: number of opportunities for knowledge transfer created (talks, meetings, events) where audience profiles demonstrate widespread impact on local community and other stakeholders. Data of Falkirk's historic assets in a range of formats and from various sources is monitored; consultations / questionnaires with local stakeholders on accessible records regarding quality and effectiveness.

Historic Environment Strategy for Falkirk Outcome:

Access to local historic assets has increased.

How this will be measured: Number of opportunities for new uses in historic sites and buildings and new heritage and landscape trails explored through partnership working with others.

Historic Environment Strategy for Falkirk Outcome:

Skills related to better understanding of the historic environment in the Falkirk area have been grown.

How this will be measured: Number of volunteers trained and spread of skills gained. Number and range of knowledge transfer events.

Historic Environment Strategy for Falkirk Outcome:

Projects for the sustainable use of historic assets are under development with funders and other project partners.

How this will be measured: Number of projects explored and developed.

Historic Environment Strategy for Falkirk Outcome:

Engagement with local communities is captured through a range of initiatives and events.

How this will be measured: Number and range of opportunities created for engagement and evaluation surveys.

Historic Environment Strategy for Falkirk Outcome:

The historic environment of the Falkirk Area is promoted and celebrated.

How this will be measured: Visitor numbers and ratings are contrasted with other tourism offers in the local area. Measures of outcomes from Awards Schemes and events such as Doors Open Day, Year of History, heritage and Archaeology etc demonstrate cultural, social and economic success.

Historic Town Steeple, Falkirk

Historic Townscape

Listed Building in Newmarket Street

9.2 Reviewing Progress

To measure ongoing attainment of success and, more significantly, to identify and learn from failure, an annual review of progress will be provided over the five year currency of the adopted strategy; this review will be submitted for scrutiny by key stakeholders including the relevant Falkirk Council Committee(s), Falkirk Community Trust, Scottish Government and Historic Environment Scotland

“The key is that all work to a shared vision and agreed aims for the historic environment. The strategy provides a framework that will enable collaborative work to ensure the most efficient use of available resources - and allows collective identification of opportunities, overlaps and gaps in activities and the ability to tackle key issues together for the benefit of the historic environment, individuals and communities alike.”

http://www.buildingsatrisk.org.uk/search/planning_authority/187

10.4 THI Community Engagement Programme 2013 - 2018

Wider Town Centre / Falkirk Community Events

Launch Event

Event to promote the THI project. The THI Team provided information on what the THI does and what it means for the community, as well as what it means to live in a conservation area. We had demonstrations from stonemason and traditional signwriter. Our exhibition of old photographs of Falkirk and old films were very popular.

2014 • 512 Visitors • Sign-making activity: 70 children

Our Falkirk Steeple Exhibition

Exhibition about history of steeple, its uses, context in Falkirk and importance as a public timepiece.

The Heritage Engagement Officer led craft activities in the exhibition on Saturdays and a group visited the exhibition from the Sensory Centre.

2014 • 3502 Visitors • 56 Children at Craft Sessions

Stories in Stone Exhibition

We worked with architecture students from Glasgow School of Art exploring the architecture of buildings in Falkirk Town. The GSA students produced 11 sketches and 13 3D models of the buildings which were displayed in the exhibition.

2015-2016 • 2,877 Visitors

Falkirk's Shops Exhibition

Exhibition exploring the history of Falkirk's shops from the Victorian to the Post-War period. This included architects drawings which were on display for the first time.'

2016 • 1631 Visitors

Lost Falkirk Exhibition

Exhibition about aspects of town centre which have changed or disappeared (i.e. cinemas, Wynds/roads, Aitkin's brewery, Old Town Hall).

2017

Our Built Heritage Exhibition

Exhibition about impact of projects like the THI can make. Show why conservation of historical buildings is important.

2018

Travelling Exhibition

Travelling exhibition about work and legacy of THI

2017-2018

Photography Competition

Working with Falkirk Delivers we had a photography competition to find out what the town centre meant to the local community.

2015 • 7 entries

Photography Exhibition

Then and now comparisons of old and new photos of town centre.

2018

Artist in Residence

An artist will be appointed to complete a 12-month residency. They will use art to start conversations with the local community.

2017-2018

Falkirk Apprenticeship Day

Free drop-in event with traditional building skills demonstrations.

2014, 2015

Festival of Architecture High Street Installation

Worked with Arka Architects and architecture students from the University of Strathclyde on a Festival of Architecture project. A 'cube' like installation was produced on the High Street exploring the architecture and history of the town.

2016

Chalk Art

In partnership with Falkirk BIB we commissioned a local artist to create chalk art around the Steeple for the duration of the Steeple works. The art includes references to Steeple history and the shops at the base of the Steeple.

2016-2017

Doors Open Day Events

Steeple 200 Weekend

Special Event across Doors Open Day weekend to celebrate the Steeple's 200th anniversary, in partnership with Falkirk Council, Falkirk Community Trust, Falkirk BID and Falkirk Local History Society. Event included live music, traditional market heritage street games, tours of the Steeple, Steeple Exhibition, THI information stall.

2014 • Steeple Tours: 400+ Visitors

Steeple Tours

Public Tours of the inside of Falkirk Steeple

2015 • 200 Visitors

THI Stall

Information on Falkirk THI Project and Events

2015 • 40 Visitors

Exploring Historic Shops

For Doors Open Day Lindsay Lennie gave a talk about the history of shops before leading a walk exploring Falkirk examples

2016 • 15

Let's Build LEGO Drop-in Event

Doors Open Day event for the younger generation. Children created buildings and other designs in Lego, Duplo and Soft Bricks.

2016, 2017 • 80 Visitors

Primary and Secondary Schools Events

School Town Heritage Walk

The THI Heritage Engagement Officer took Primary 2 pupils from St Andrews School on a walk around the town centre

2013 • 54 (2 P2 Classes)

Picturing Our Steeple School Art Project

Artist Susheila Jamieson delivered this heritage art based project to primary schools. The artist worked with P6 or 7 pupils to create artwork based on the Steeple. The artwork produced was displayed alongside the Steeple Exhibition.

2014 • Four Local Primary Schools

Steeple History Teacher CPD

CPD for Teachers based on the Steeple Education Pack. Looking at exploring the history of the Steeple both in and outside the classroom

2015 • 3 Teachers

Steeple Education Pack

Pack of Learning Resources for Teachers about the history of Falkirk Steeple. Produced for Steeple 200 anniversary.

2014 • Distributed to 38 schools

Falkirk's Shops: First Impressions

Artist Sarah Wakeford has been working with P6 or/ and P7 pupils at four local Primary Schools on this art project exploring historic shopfronts.

2016 • Four Local Primary Schools

Architecture Education Pack

Pack of Learning Resources for Teachers exploring different architecture styles of buildings in Falkirk town centre.

2016-2017

Exploring Heritage on Your Doorstep CPD

The THI Heritage Engagement Officer will lead a CPD for Teachers exploring how built heritage can be used as a learning resource both inside and outside the Classroom.

2016-2017

Heritage Trail Pack for Teachers

Create a Town Heritage Trail Resource for Primary School Teachers.

2017-2018

Heritage Interpretation Events

Falkirk Town Heritage Trail App

Produce a Smart Phone App walking tour/heritage guide to Falkirk town centre.

2017

Volunteer Tour Guides

Train a number of volunteers to become Tour Guides of the town centre.

2017

Falkirk Local History Society

Research Group

The THI supported 10 members of FLHS we had never undertaken historical research before. The members of the group picked a building in the town centre and researched into its history. The groups also exploring the buildings through art sketches of architectural details.

10 members of FLHS

Calatria

September 2014: Special Edition of Calatria on Falkirk Steeple

November 2015: Special Edition of Calatria on Falkirk Town Centre

2016-2018: Two further editions of Calatria

Walks

FLHS delivered a number of walks for the THI.

2014 • 2 Walks • 10 attendees

2016 • 4 Walks • 20 attendees

Talks/Consultations

Talk at FLHS Meeting

The THI Heritage Engagement Officer did a short talk at the start of the FLHS Meeting about the THI and the launch event.

2014 • 60 FLHS members

Callendar House Talks

Heritage Engagement Officer did three lunchtime talks at Callendar House to members of the public about the THI.

2015 • 40 attendees approx

Talk to Falkirk Probus Club

Heritage Engagement Officer talked to Probus Club about the THI.

2015

3D Scanning Talk

Doug Pritchard from Herriot Watt University gave a talk in Callendar House about 3D scanning and built heritage.

2015 • 28 people

THI Public Realm Consultation

Informal consultation with the public about plans for improving the Public Realm.

2016

THI Seminar Programme 2016 - 2017

Looking after Traditional Shopfronts:
Tuesday 22nd November 2016

Dampness & Organising Shared Repairs:
Wednesday 30th November 2016

Looking after your Roof - leaks:
Wednesday 7th December 2016

Looking after the Exterior Walls of your Property
- stone decay and repair, harling and paint issues:
Wednesday 11th January 2017

Looking after your Windows and Doors - draughts,
leaks and broken windows 6 - 8pm:
Wednesday 18th January 2017

Energy Efficiency in Traditional Buildings:
Wednesday 1st Feb 2017.

10.5 Local Trails and Information Panels

Existing: Bo'ness Town Trail, Falkirk Heritage Trail, Airth Paths Leaflet, Denny Paths Leaflet, Bonnybridge Interpretation Panel, Antonine Wall Paths Leaflet, River Avon Heritage Trail

Under Development: Falkirk Battlefield Trail, Antonine Wall Trail, Braes Paths Leaflet, Larbert and Stenhousemuir Path Leaflet and Grangemouth Town Leaflet

Future Projects Under Consideration: Carron Iron Company Trail, Bo'ness Heritage Trail

10.6 Funding Sources

Historic Environment Scotland:

Historic Environment Repair Grant

A scheme which helps with the cost of repairs to buildings of special interest.

Grants for Places of Worship Scheme Help with the cost of urgent repairs to listed places of worship.

Historic Environment Support Fund A small fund used to provide support for one-off heritage events.

Organisational Support Fund

Providing financial support to organisations responsible for the operation, management or safeguarding of historic environment assets.

Conservation Area Regeneration Scheme (CARS) Support for regeneration and conservation initiatives over a five-year period.

Ancient Monument Grant Scheme Funding for the conservation and maintenance of Scotland's ancient monuments.

Archaeology Programme funding Funding for research and intervention projects to further our knowledge of the historic environment and rescue archaeological information.

Thatched Buildings Maintenance Scheme Financial support for the repair of historic traditional thatched properties.

Maintenance Plan Grants Scheme

Help with the preparation of maintenance plans for historic buildings.

Landscape Management Plan Grants Scheme Help towards the preparation of landscape management plans for Inventory gardens.

Centenary Memorials Restoration Fund Financial support for communities for the conservation and repair of war memorials.

Falkirk Environment Trust

Falkirk Environment Trust is a local charitable trust which aims to support environmental projects by awarding grants and supplying advice and support.

FET operates Small Grants Schemes - £10k total fund level every year with max grant up to £2k. Funded training for surveys is available.

Heritage Lottery Fund Programmes:

Sharing Heritage (£3,000 to £10,000) is part of the Year of History, Heritage and Archaeology 2017. The Sharing Heritage programme is for any type of project related to national, regional or local heritage in the UK

Young Roots (£10,000 to £50,000)

The Young Roots programme is for projects that engage young people with heritage in the UK.

Heritage Enterprise - £100k to £5m

The Heritage Enterprise programme is for projects that seek to achieve economic growth by investing in heritage. It is primarily for enterprising community organisations to help them rescue neglected historic buildings and sites and return them to a viable productive use.

Our Heritage £10k to £100k

Outcomes for heritage: With our investment, heritage will be: better managed in better condition better interpreted and explained identified/recorded

Outcomes for people: With our investment, people will have: developed skills learnt about heritage changed their attitudes and/or behaviour had an enjoyable experience volunteered time

Parks for People £100k to £5m

Historic public parks and cemeteries are valued places at the centre of local communities. Help to conserve them with funding of £100,000-£5million.

Resilient Heritage - Resilient Heritage programme will accept applications for grants of between £3,000 and £10,000 for activities currently supported through Start-up Grants programme.

Landscape Partnerships - £100,000 to £3,000,000

From majestic mountains to open countryside and windswept coasts, conserve areas of distinctive landscape character.

Heritage Grants over £100k

“Heritage includes many different things from the past that we value and want to pass on to future generations, for example:

archaeological sites; collections of objects, books or documents in museums, libraries or archives; cultural traditions such as stories, festivals, crafts, music, dance and costumes; historic buildings; histories of people and communities; histories of places and events; the heritage of languages and dialects; natural and designed landscapes and gardens; people’s memories and experiences (often recorded as ‘oral history’); places and objects linked to our industrial, maritime and transport history; and natural heritage including habitats, species and geology.

Parks for People (£100,000 to £5million)

Parks for People is for projects related to historic parks and cemeteries in the UK.

Our Heritage (£10,000 to £100,000)

The Our Heritage programme is for any type of project related to national, regional or local heritage in the UK

Heritage Enterprise (£100,000 to £5million)
