**USE OF LAND AND PREMISES AS
MATERIALS AND SOIL TREATMENT
FACILITY (CLASS 5 GENERAL
INDUSTRIAL) AT CARRON WORKS,
STENHOUSE ROAD, CARRON,
FALKIRK, FK2 8UW FOR ATG
GROUP - P/18/0351/CPE**

FALKIRK COUNCIL

Subject: USE OF LAND AND PREMISES AS MATERIALS AND SOIL TREATMENT FACILITY (CLASS 5 GENERAL INDUSTRIAL) AT CARRON WORKS, STENHOUSE ROAD, CARRON, FALKIRK, FK2 8UW FOR ATG GROUP - P/18/0351/CPE

Meeting: PLANNING COMMITTEE

Date: 12 September 2018

Author: DIRECTOR OF DEVELOPMENT SERVICES

Local Members: Ward - Carse, Kinnaird and Tryst

Councillor Gary Bouse
Councillor Joan Coombes
Councillor Jim Flynn
Councillor Laura Murtagh

Community Council: Larbert, Stenhousemuir and Torwood

Case Officer: John Milne (Senior Planning Officer), Ext. 4815

1. DESCRIPTION OF PROPOSAL / SITE LOCATION

- 1.1 This application relates to a Certificate of Lawfulness (Existing Use) for the use of land and buildings at Stenhouse Road, Carron, Falkirk. This use falls within Class 5 of the Town and Country Planning (Use Classes) (Scotland) Order 1997.
- 1.2 The applicant submits that this site has been used as a waste facility (Class 5 General Industrial) for a period in excess of ten years. The types of waste that have been dealt with has included but not limited to domestic, industrial, commercial, soils and muds. Details of the types of waste dealt with in this facility are noted in the Scottish Environment Protection Agency (SEPA) Waste Management Licence and Modifications submitted with the application. In addition, the applicant has submitted a letter from Falkirk Council dated 29 May 2000, confirming that formal planning permission was not required to operate a material recycling facility at the site.
- 1.3 The applicant plans to continue operating this site as a waste management facility but intends only accepting waste soils for recycling and re-use. SEPA have provided a letter dated 8th August 2018 to Falkirk Council. This confirms that the documents provided by the applicant as relates to Waste Management Licenses are SEPA license documents. With regard to external storage of materials, such operational activities did take place but the Waste Management License was modified in 2012 to no longer allow external storage. The applicant confirms that there has been short periods since 2000 when activities on site were greatly reduced. This was a result of the site changing from one operator to another. However during these periods, waste was still stored on site, the Waste Management Licence was still in place and the site was still being regulated by SEPA.

2. REASON FOR COMMITTEE CONSIDERATION

- 2.1 It is considered appropriate that this application be determined by the Planning Committee given that a similar application P/17/0733/CPE has previously been considered and is the subject of a separate report on this agenda.

3. SITE HISTORY

- 3.1 An application for Certificate of Lawfulness - P/17/0733/CPE for the use of land and premises as materials and soil treatment facility (Class 5 General Industrial) - is pending determination and as stated above is the subject of a separate report on this agenda.

4. CONSULTATIONS

- 4.1 There is no requirement for consultations to be undertaken for an application for a Certificate of Lawfulness. However, it was considered appropriate in this instance.
- 4.2 SEPA has raised no objection.
- 4.3 SEPA advise that the Waste Management Licence was modified in 2012 to no longer allow the previously authorised external storage of wastes.

5. PUBLIC REPRESENTATION

- 5.1 In the course of the application, 128 contributor(s) submitted letter(s) to the Council. There is no requirement for neighbour notification to be undertaken in relation to this application. However, it is considered prudent to consider any representations received. The salient issues are summarised below:-
- The grounds under which the certificate is sought has been selected as "The use began more than 10 years before the date of this application and has operated continuously". A letter sent by SEPA to residents on 28 November 2012 states that Oran Environmental Solutions had vacated the site and that all residual waste had been removed. It also stated that they had no plans to trade on the site in the future.
 - There is no further evidence of activity on the site at Carron Works, Stenhouse Road until 27 August 2015 when an application to transfer the licence to Envirotreat Scotland Ltd was submitted. This totals 33 months where no operations have taken place.
 - The site appears abandoned.
 - The SEPA license has been breached, through the storage of materials in the existing shed.
 - The SEPA license has been breached by the storage of materials in the yard area.

- The previous operators of the site did not adhere to good practices, resulting in odour complaints, noise complaints and issues relating to flies and vermin.
- There are other sites more appropriate for this type of use and to authorise such a use in the middle of a housing area is not appropriate.
- Health of residents will be at risk.
- The notification exercise is flawed, in that not enough residents were contacted.
- Notification of a public meeting was short notice
- The business credentials of operators are in question.
- This is not what local residents want or indeed need.

5.2 The applicant has stated that while activity levels on the site have fluctuated over time, it has been consistently used for the recycling of waste. Waste is kept on site prior to it being recycled to ensure sufficient material is available at all times. Waste has been kept on site continuously. Waste Management Licences have applied to this site for well over ten years, as has been confirmed by SEPA. At the present time there is approximately 5,000 tonnes of waste soils on site awaiting treatment/recycling. It is intended that it is dealt with by the applicant once the planning position is confirmed

6. PLANNING ASSESSMENT

6.1 Section 150(1) of the Town and Country Planning (Scotland) 1997 Act enables anyone (not just the landowner or a person with an interest in the land) to apply to the planning authority for a decision on whether a specified existing use, operational development, or failure to comply with a planning condition or limitation, which has already taken place, is lawful for planning purposes. For the purposes of this Act, uses and operations are lawful at any time if -

- (a) no enforcement action may then be taken in respect of them (whether because they did not involve development or require planning permission or because the time for enforcement action has expired or for any other reason), and
- (b) they do not constitute a contravention of any of the requirements of any enforcement notice then in force.

In respect of failure to comply with conditions or limitations attached to a grant of planning permission, such failure may be considered lawful at any time if -

- (a) the time for taking enforcement action in respect of the failure has then expired; and
- (b) it does not constitute a contravention of any of the requirements of any enforcement notice or breach of condition notice then in force.

6.2 The salient issues in the current application are:-

- The applicant has submitted a letter from Falkirk Council dated 29th May 2000, confirming that the use of the site as a Materials Recycling Facility in terms of the Town and Country Planning (Scotland) Act 1997, was considered to be “permitted development”. Formal planning permission was not required.
- The applicant submits that an original Waste Management License was issued by SEPA in December, 2000 with the issue of a further 5 Waste Management License modifications in total for the site between 2009 and 2016. Copies of these licenses have been submitted within the application. A summary of activities contained within the licences are, to date, permitted wastes including household, commercial, industrial, scrap metal, asbestos, hazardous and non-hazardous soils and muds. The hours of operation are consented to be Mon - Fri 06.00 - 22.00. Sat 06.00 - 16.00. Sun 08.00 - 16.00. Permitted tonnage 74,999 tonnes/annum.
- To ratify the evidence, SEPA were consulted and have offered no objection. SEPA confirms that the information submitted is accurate in that it describes the licensed activities at the site. The activities that have gone before have been waste management activities and are as described in the Waste Management Licence conditions. The authorisations have been active, and still are, however due to financial issues and the requirement to apply for a Pollution Prevention and Control permit no physical works have taken place at the site since 2016. This does not mean that they could not recommence under the stipulations of the active Licence. Falkirk Council's Environmental Protection Unit have also been notified of the application and advise that the proposed site would operate under a full Waste Management Licence and as such all matters relating to noise would fall under the remit of SEPA to investigate and enforce.

6.3 Issues relating to contaminated land falls under SEPA's regulatory duties and potential odour and dust Issues arising from site construction and operation should be minimised/managed via appropriate SEPA Waste Management Licence conditions and operational site plan. These matters are not controlled by the Planning Authority and the objector is advised to approach Falkirk Council's Environmental Protection Unit and SEPA to secure remedy to perceived nuisances.

6.4 In real terms, the issue of this certificate ratifies that the entire site can be used for the purposes of Class 5 General Industrial within the Town and Country Planning (Use Classes) (Scotland) Order 1997.

6.5 Matters for consideration are:-

- (a) is the use of the site evidenced as a Class 5 General Industrial use; and
- (b) has the regulation of the operations within the site fallen within SEPA's remit under the Waste Management Licence over the last 10 years?
- (c) Matters raised through representation received.

It has been evidenced that the site has been considered as part of Class 5 - General Industrial - buildings and operations relating to the wider area known as Carron Works over a lengthy period.

It has also been evidenced that an appropriate regulator - SEPA - has the ability to regularise operations on the site. Indeed, submitted evidence would verify that the operations to be recognised have been subject to such regulation and licence.

- 6.6 Representations in relation to this application were not sought by Falkirk Council. It should be noted that in relation to application P/17/0733/CPE the Planning Committee, at its meeting on 30th May 2018, agreed that neighbouring properties and the applicant be written to seeking their views in relation to specific matters.
- 6.7 The representations received are noted. However they do not raise any matters either relevant to the determined of the application or which would indicate that a Certificate of Lawfulness should not be issued. It is not considered that, albeit there have periods of little or no activity, that the site has been abandoned. Material is still stored in the buildings, the site and buildings are secure, wind and watertight and there has been no intervening issues. Any breaches of SEPA licences are not a matter for the Planning Authority. The Planning merits of the use are not matters that can be taken into account in the determination of this application, nor can the practices of previous operators or the identity of the applicant.

7. CONCLUSION

- 7.1 The Planning Authority is not in a position to weigh the merits or otherwise of the proposal in terms of Development Plan policies. This type of application required an evidence based determination as to whether the use of the site has been established and is considered lawful in the absence of an explicit planning permission. The applicant has submitted sufficient evidence that Falkirk Council were aware of waste management activities on the site in May, 2000. Correspondence with various parties and Falkirk Council regarding waste management activities on the site continued in 2015. The applicant has submitted sufficient evidence through a timeline of Licences issued by SEPA for the types of activities sought to be continued on the site. Based on the evidence submitted by the applicant and in the absence of any contradictory evidence being apparent, it is considered that the applicant has satisfactorily demonstrated that the site has been used for the purposes of waste management (Class 5 of the Town and Country Planning (Use Classes) Scotland Order 1997), including soil treatment, for a period in excess of 10 years. It is acknowledged that the site has been inactive since 2016. However taking into consideration, this recent time frame of inactivity and the fact that a Waste Management Licence is in place, it is considered that the site can be viewed as being in a period of use in excess of ten years. The recent lack of activity would not render the use abandoned. A Certificate of Lawfulness should therefore be issued.

8. RECOMMENDATION

8.1 A Certificate of Lawfulness should be issued for the following reasons:

- 1. Based on the evidence available, it is considered that it has been satisfactorily demonstrated that the site has been used for a use within Class 5 (General Industrial) of the Town and Country Planning (Use Classes) (Scotland) Order 1997. A certificate of lawfulness should therefore be issued.**

Informative(s):-

1. For the avoidance of doubt, the plan(s) to which this decision refer(s) bear our online reference number(s) 01.
