

Waste

Reuse

Put your plastic bottles in your local recycling point.

Please remove the lids and rinse the bottles before placing them in your recycling point.

Reduce Journey

Your plastic waste is taken to a transfer station where it is baled. It is then sorted and washed.

Recycle

Your plastic waste is then granulated. The granules are then melted down and extruded as threads.

Plastic

The plastic granules are used to make items such as compost bins and garden furniture.

let's get it sorted
