Falkirk

The above graph shows the comparison of the number of incidents recorded by CCTV per day of the week. The graph shows that Friday to Sunday over all four years, are the busiest days of the week, with Monday to Thursday being the least busiest. The graph also shows that in 2013-14, the graduate from Monday to Sunday is less steep than in the other three years.

Falkirk

The above graph shows the comparison of incidents logged, by type, over the past four years, with most incident types being almost identical over this timeframe. The graph also shows the public disorder log as being the most common over the past four years.

Falkirk

The above graph shows a comparison of incidents recorded for each month, over the last four years, with the last three years being very similar in the amount of incidents recorded per month, throughout the whole year, with the exception of April and May 2011-12.
