

INTRODUCTION

This Information Bulletin is divided into two parts. Part 1 (all pages with the exception of the section coloured green, which relates only to tenders and which is found at the end of the Bulletin) presents a number of papers, which are designed to update Members, Officers and the citizens of the area of ongoing issues of interest which would not be expected to be dealt with through the Council's formal decision-making processes. These papers are relatively informal in terms of style and format and are an additional and important reporting mechanism for the Council which is easily accessible and which it is hoped will be a useful reference document.

In terms of its Contract Standing Orders, the Council has a requirement to report all Contracts referred to in Standing Order 6.2. The Information Bulletin is considered to be ideal for this purpose and any such papers can be found in Part 2 (the section coloured green) of the document.

Any general enquiries regarding the Information Bulletin should be directed to Chief Executive Office (Brian Pirie, Democratic Services Manager Ext 6110).

- Contract for Regeneration at Denny Town Centre (DEN-7010) 124

FALKIRK COUNCIL

SUBJECT: **MAPPA ANNUAL REPORT 2013-2014**
MEETING: **INFORMATION BULLETIN**
DATE: **13 MAY 2015**
AUTHOR: **DIRECTOR OF SOCIAL WORK SERVICES**

1 INTRODUCTION

- 1.1 The purpose of this report is to brief Members on the content of the annual Multi Agency Public Protection Arrangements (MAPPA) report 2013-14.

2 BACKGROUND

- 2.1 On 4 September 2007, the Housing and Social Services Committee considered a report on the introduction of MAPPA and its associated guidance. The matter was referred to the Policy and Resources Committee on 11 September 2007 and to a meeting of Falkirk Council on 3 October 2007.
- 2.2 Since 2007, two further annual reports were considered by Committee in 2009 and 2010. Since 2010, the annual report has been described to Members through the Information Bulletin.
- 2.3 While Members do not have a role in decision making in individual cases, it is important that Elected Members are familiar with how the MAPPA arrangements operate in practice and the role that these arrangements play in promoting public safety. The MAPPA annual report provides a mechanism for informing both the Elected Members and also the wider public about how local processes are operating, as well as identifying patterns and trends.

3 FORTH VALLEY MAPPA ANNUAL REPORT 2013-2014

- 3.1 The report provides a summary of what MAPPA is and how it operates as a national framework in order to maximise public safety and to protect the public from being harmed by sexual and violent offenders including restricted mentally disordered patients. The arrangements do not yet include violent offenders, although this is due to be implemented from 1 April 2015.
- 3.2 The report summarises the roles of responsible authorities (Police, Local Authorities, Scottish Prison Service and Health) as well as those agencies which have a duty to co-operate. It highlights also what MAPPA means for offenders.
- 3.3 The three levels at which offenders are managed are outlined in the report:

Level 1 – when the identified risk can be managed by one agency without significant active involvement by other agencies; (routine risk management);

Level 2 – when the risk plans require the active involvement of several agencies via regular public protection meetings in relation to individual offenders;

Level 3 – when arrangements are as for Level 2, but with the additional requirement to involve senior officers to authorise the use of special resources and/or to provide ongoing senior management oversight.

- 3.4 Restricted Patients, who have been included with MAPPAs since April 2008, are those subject to detention or restriction under mental health legislation and who are also sexual or violent offenders. In these cases, MAPPAs are combined with the Care Programme Approach which enhances cross agency awareness of mental health issues.
- 3.5 This year the report highlights the group work programmes which are additionally provided for sex offenders over and above the normal supervision requirements in the community and also in custody. The prison programme, then termed “Good Lives” was rolled out into the community during 2014 and renamed “Moving Forward: Making Changes”. All staff in both the programmes team and community supervision team have attended a variety of training courses over the past year to ensure that they are able to provide the “Moving Forward; Making Changes” programme.
- 3.6 Falkirk Council is funded by Scottish Government through the Community Justice Authority to provide the sex offender programmes across the Forth Valley. This is a team with a long track record of delivering sex offender programmes and, by so doing, contributes towards enhancing Public Protection.
- 3.7 The report outlines the role of the MAPPAs Strategic Oversight Group and the sub-groups which bring the partners together to monitor and develop processes and ensure that Public Protection is at the heart of our joint working.
- 3.8 Refreshed MAPPAs guidance was published in June 2014 and this introduced new templates to be used for MAPPAs meetings.
- 3.9 The first national inspection of MAPPAs across Scotland commenced in January 2015. The inspection is being undertaken jointly by the Care Inspectorate and Her Majesty’s Inspectorate of Constabulary.
- 3.10 Forth Valley was required to submit a position statement to the Inspectors by 23 January 2015 and we anticipate that the fieldwork (case reading and focus groups) will take place week commencing 11 May 2015.
- 3.11 The annex to the report breaks down a variety of statistics relating to registered sex-offenders across the Forth Valley. Figures extracted from the report are detailed in Appendix 1 alongside a relevant breakdown of Falkirk Council statistics.

3.12 The statistics relevant to Falkirk indicate that the Local Authority is the lead agency for 34 out of 94 RSO's due to the offender being subject to statutory supervision, with the Police leading on 60. It also highlights that, as at 31/03/2014, 85 RSO's were managed at level 1 and 9 at level 2, with no offenders at level 3.

3.13 During 2013-2014, 11 RSO's were reported for failing to register appropriately (5%) across Forth Valley. It has not been possible to break down this figure for Falkirk only. There were no missing or wanted RSO's during the period. In 2013-2014, no registered sex-offenders were convicted of any further sexual offences.

4 CONCLUSION

4.1 The MAPPAs Annual Report 2013-2014 is published and available on the FFV Community Justice Authority website for information:-

http://www.ffvcja.co.uk/component/option,com_docman/Itemid,7/dir,ASC/gid,80/limitstart,5/order,name/task,cat_view/

b) Subject to notification requirements only :	68

FALKIRK COUNCIL

Subject: FALKIRK COUNCIL INVOLVEMENT IN INTERREG IVC
YOUNG SMEs PROJECT: FINAL REPORT
Meeting: INFORMATION BULLETIN
Date: 13 MAY 2015
Author: DIRECTOR OF DEVELOPMENT SERVICES

1.0 INTRODUCTION

1.1 On 6th March 2012 Members approved the Council's involvement in a INTERREG IVC Young Small Medium Enterprises (SMEs) project. A further update was provided February 2013. The purpose of this report is to provide a final report on activity and outcomes of the project.

2.0 BACKGROUND

2.1 European research shows that business survival rates drastically decrease to under 50% in a business's fifth year of operation. This is because existing business support services tend to focus on start up and the early stages of business development. As part of the Europe 2020, The European Union's ten year growth and strategy plan, the objective of the INTERREG IVC Young SMEs project was to share best practice to develop an integrated support programme for young SMEs to boost the survival rate of businesses between their third and fifth year of activity.

2.3 Twelve partners were selected for the project which is led by INCYDE Foundation from Spain and made up of Falkirk Council, Oldham Metropolitan Borough Council, South-East Regional Authority (Ireland), Malta Enterprise (Malta), Central Transdanubian Regional Innovation Agency (Hungary), City of Koblenz (Germany), Regional Government of Valencia (Spain), KTU Regional Science Park (Lithuania), Torun Regional Development Agency (Poland), Athens Tourism & Development Agency (Greece) and Development Centre Litija (Slovenia).

2.5 All partners were involved in the project preparatory process and identified common factors that could address the low survival rates of SMEs aged 3 – 5 years. The project officially started on 12th March 2012 and concludes 31st March 2105

3.0 PROGRAMME OUTCOMES

3.1 Eight themed groups were established to identify and analyze *Good Practice* activity taking place within each of the partner countries:

- Alternative forms of Funding
- Business and Market Development
- New technologies & E-business
- Management

- Cooperation among SMEs
- SMEs and the Public Sector
- Local Networking
- Industry/Business linkages with academia

Falkirk Council participated in 47 best practice sessions and with other project partners selected *Best Practice* initiatives that will be put forward to create a European business support programme and model.

3.2 Falkirk was chosen to lead on the SMEs and the Public Sector theme with three other European partners, focusing on the role of public sector in supporting SMEs. Additionally Falkirk Council also presented *Good Practices* within four other themes: Business & Market Development – Retail Support and Training; SME’s & Co-operation – Business Improvement Districts; SME’s & Local Networks – The Falkirk Business Panel and finally Management – Business Gateway Growth Pipeline.

3.3 On conclusion of all *Good Practice* presentations, 25 *Best Practices* were selected by all partners of these, 4 Falkirk projects were selected by programme partners as *Best Practice* and were subsequently chosen by three other areas (Spain, Greece and Germany) as *Best Practice* examples which they have further investigated and will introduce within their local economies. Representatives from Koblenz in Germany, and Athens in Greece visited Falkirk to attend the Business Panel Update Event, the Guide to Successful Retailing course and to meet with local businesses to find out about their experiences. The group also received a full overview of Falkirk business support and particularly how Business Gateway services are delivered.

3.4 In the context of the Council’s existing business support activity, officers with the Growth & Investment Unit selected to re-visit Oldham Metropolitan Borough Council to review their *Good Practice* business support activity and choose two *Best Practice* examples to consider transferring to Falkirk.

- Oldham Business Breakfasts (Working Group 1 - Business and Market Development)
- Oldham Construction Network (Working Group 5 SME's & Local Network)

3.5 As a consequence the Growth & Investment Unit is now transferring the following *Best Practice* models as follows.

- *Business Breakfasts:* Falkirk ran an initial programme of sector focused three business breakfasts over three days in November 2014 – focusing on:

Engineering Opportunities	-	11/11/2014	-	40 attendees
Falkirk’s Food & Drink	-	12/11/2014	-	50 attendees
New Energy Sector	-	13/11/2014	-	30 attendees
- *Sector Networks:* this template has been adopted to deliver the Falkirk Food and Drink Network for the Year of Scotland Food and Drink 2015. First steps have been to research the local food and drink industry, this will be followed by the development of a Food and Drinks network leading to a series of events to develop the industry in the area. Improved awareness of local produce and increased percentage spend kept locally through sharing opportunities and developing a supplier/buyer finder are the main objectives of this work.

- 3.6 The Young SMEs project identified a 5 stage process for policy makers to follow when integrating support for Young SMEs into action plans and made recommendations for policy makers to support Young SMEs at the highest levels. A full version of the Young SMEs policy document and project is available at www.youngsmes.eu

4.0 IMPLICATIONS

Policy

- 4.1 This activity accords with the Council's European Strategy which identified the following action: Increase the provision of mechanisms to enhance business leadership, management skills and knowledge that will help businesses grow and succeed in the Falkirk area; the Community Plan, My Futures in Falkirk, the Single Outcome Agreement Some best practice examples will influence proposals in the new Economic Strategy to be delivered in 2015

Personnel

- 4.2 The project has been led by the Growth & Investment Unit within Development Services which is responsible for Falkirk Council's business support activities. In total 12 staff from Growth & Investment Unit, Finance Services and Corporate & Neighbourhood Services participated in Falkirk Council's contribution to the project with 75% of all time and costs incurred recovered from the project grant funding award.

Financial

- 4.3 Falkirk's total initial outline cost was £154k. The final total project cost of Falkirk Council participating as a partner was £82.5k (€111.3k) with an EU grant intervention rate of 75% on total project costs. The revenue contribution of Falkirk Council's participation in the project was £20.6k (€27.8k) over the three years. Total external grant claimed through the project was £61.9k (€83.4k) The Council's contribution to the project involved mainly staff time.

An External Compliance Audit from the Department for Communities and Local Government and an internal audit from Falkirk Council was conducted during the life time of the project. Both audits were concluded as satisfactory with regards to project compliance.

Legal

- 4.4 The lead partner of the project is a public authority in Spain and a partnership agreement was formed between all partners – there were no additional requirements to seek local legal advice from Falkirk Council.

5.0 CONCLUSION

- 5.1 With current economic conditions remaining uncertain, support for the survival of young SME's remains critical. The INTERREG IVC Young SMEs project has not only been an opportunity to identify best practice from other project partners but it has also provided Falkirk Council with a network of partners that the council could potentially work with in the future on other European funded projects. Additionally four out of five business

support practices currently delivered by Falkirk Council were adopted as *Best Practice* and included in a final project outcome report to the European Union. Falkirk Council has in turn adopted two *Best Practices* to enable improvements for the benefit of local young SMEs.

- 5.2 The Growth & Investment Unit will continue to interact with the project partners and sharing business support ideas and projects; the final project literature will be circulated within Falkirk Council and external stakeholders to ensure benefits from the accumulated best practice are shared.

FALKIRK COUNCIL

Subject: ROADS MAINTENANCE CAPITAL PROGRAMME 2015-16
Meeting: INFORMATION BULLETIN
Date: 13 MAY 2015
Author: DIRECTOR OF DEVELOPMENT SERVICES

1 INTRODUCTION

- 1.1 This report provides information on the roads maintenance capital works programme for financial year 2015-16
- 1.2 The programme of works for carriageways and footways is attached as an appendix to the report.

2 BACKGROUND & METHODOLOGY

- 2.1 The Council, at the budget setting meeting in February this year, allocated £2.65m for the structural maintenance of roads. In addition to this sum, £158k of revenue funding has been capitalised giving a total budget of £2.808m.
- 2.2 The attached programme of works lists the carriageway and footways schemes in priority order and indicates a cut-off point which designates the limit of the available funding allocated for the current financial year.
- 2.3 In accordance with the methodology detailed in the Council approved Road Asset Management Plan, works to carriageways and footways are prioritised utilising a combination of an assessment of road surface condition, road use (traffic volume), and a weighting for hierarchy level.
- 2.4 A prioritisation list is then compiled and used to form a three-year rolling programme of structural repairs. The methodology favours high traffic volume, high-risk roads, therefore, a proportion of the budget has been allocated to ensure that low volume, rural, roads and unclassified residential streets, such as culs-de-sac, are also considered in the prioritisation matrix.
- 2.5 Footways are similarly assessed and prioritised.

3.0 RECOMMENDATIONS

Members are requested to;

- 3.1 Note the programme of works for carriageways and footways for 2015-16**
