MOTION

That Committee agree to continue the application to a future meeting of the committee (the next meeting if possible) to allow:-

1. officers and the applicant to enter into discussion to investigate and better understand the methods and outcomes of noise testing including the locations at which such testing can take place;
2. representatives from SEPA be invited to attend the Committee to clarify and explain (a) their regulatory role and remit in relation to sites such as the application site, (b) their view on the application as a statutory consultee and (c) their decision to modify the Waste Management Licence on 17 March 2016 to increase the maximum tonnage per year and amend the site boundary to include the north-west area; and
3. officers to report more fully on the planning history of the site, the consequences and outcomes of that planning history and the current position with the site.

Moved by: J McLuckie

Seconded by: M Nicol

AMENDMENT

That Committee refuse planning permission for the following reason:-

1. The proposal has a strong likelihood of causing a significant adverse impact on noise sensitive residential properties in the area, to the detriment of residential amenity, potentially on an on-going basis, and it has not been demonstrated that such impacts could be mitigated to an acceptable level.

Informative(s):-

1. For the avoidance of doubt, the plan(s) to which this decision refer(s) bear our online reference number(s) 01.
