

**P90. Erection of 91 Dwellinghouses and Associated Infrastructure at Land to the South West of Tappernail Farm, Reddingmuirhead for Persimmon Homes (East Scotland) – P/17/0504/FUL**

With reference to Minute of Meeting of the Planning Committee held on 24 January 2018 (Paragraph P79 refers), Committee gave further consideration to a report by the Director of Development Services on an application for full planning permission for the erection of 91 dwellinghouses and associated infrastructure at land to the south east of Tappernail Farm, Reddingmuirhead.

The Convener introduced the parties present.

The Planning Officer outlined the nature of the application.

The applicant was heard in relation to the application.

A representative of the former Reddingmuirhead and Wallacestone Community Council was heard in regard to the application.

A representative of the Shieldhill and California Community Council was heard in regard to the application.

6 objectors and 1 neutral party were heard in regard to the application.

The objections included the following issues:-

- The application is contrary to the Falkirk Local Development Plan and the Reporter's examination findings and decision
- The application represents an over development of the site
- The landscape and visual impact of the development would be significant
- H69 should be master planned
- Substantial green space would not be achieved and the proposals would destroy the landscape setting and countryside amenity of the area
- Housing allocation H69 is bigger than that shown in the Main Issues Report. The additional space was for extensive planting and habitat improvements, not additional units
- The applicant's statement in relation to depopulation within the surrounding area, is misleading and incorrect
- The site would not be served by a sustainable means of transport
- The proposed development does not represent an appropriate scale, density and design of development
- Road safety concerns, if planning permission is granted a roundabout or other method of safely allowing access is required
- The proposed development represents an overdevelopment of the site. The previous application was refused because it exceeded the housing capacity of 30 units
- The site will remove an existing green space and reduce the opportunity to walk
- Inadequate capacity in catchment schools

- Improvement from the last application, but there could be a further reduction and more detached homes

Questions were then asked by members of the Committee.

The Convener concluded by thanking the parties for their attendance. The matter would be determined by the Planning Committee on 20 February 2018.
