

CCG10. Hospital Acquired Infection: Winter Performance Report

The committee considered a report by the Lead Nurse, Infection Control which provided an oversight of all Hospital Acquired Infection (HAI) related activity across Falkirk Community Hospital and Bo'ness Community Hospitals from January 2020 – April 2020 including details of all Staph aureus bacteraemias (SABs), Clostridioides difficile Infections (CDIs), Escherichia coli Bacteraemia (ECBs) and Device Associated Bacteraemias (DABs) for these areas with a brief summary of the investigations that had been carried out.

The report detailed performance in regard to targets for the period 2019-2022 together with the approach to reduce and prevent the HAIs.

Decision

The committee noted the report.
