Local Government Benchmarking Framework 2019/20

FALKIRK COUNCIL

Subject: Local Government Benchmarking Framework 2019/20

Meeting: Scrutiny

Date: 1 April 2021

Author: Director of Corporate & Housing Services

1. Purpose of Report

- 1.1 This report provides an update on the Local Government Benchmarking Framework (LGBF) data for 2019/20. The Improvement Service published the 2019/20 Local Government Benchmarking Framework in February 2021.

2. Recommendations

- 2.1 It is recommended the Committee

- (1) Approve the report and acknowledge progress by Falkirk Council in meeting Council LGBF priorities.**
- (2) Where required, request further information on any specific aspects of the information provided.**
- (3) To note that a report will be provided to Members in June on a review of the Corporate Plan to date.**

3. Background

- 3.1 The Local Government Benchmarking Framework is a national approach to preparing, comparing, and improving the performance of Councils in Scotland. The LGBF is a requirement of the Audit Commission and is compiled by the Improvement Service, on behalf of the Society of Local Authority Chief Executives (SOLACE).
- 3.2 The Accounts Commission use the LGBF indicators as a key element of the statutory performance reporting framework. The indicators are used by Auditors to review the Council's focus on improvement during annual and Best Value audits.
- 3.3 The LGBF provides Elected Members, the public, and management with comparative service performance data across Scotland. It is, however, important that all Council's supplement the indicators contained within the LGBF with additional data and contextual information to reflect local priorities and concerns.

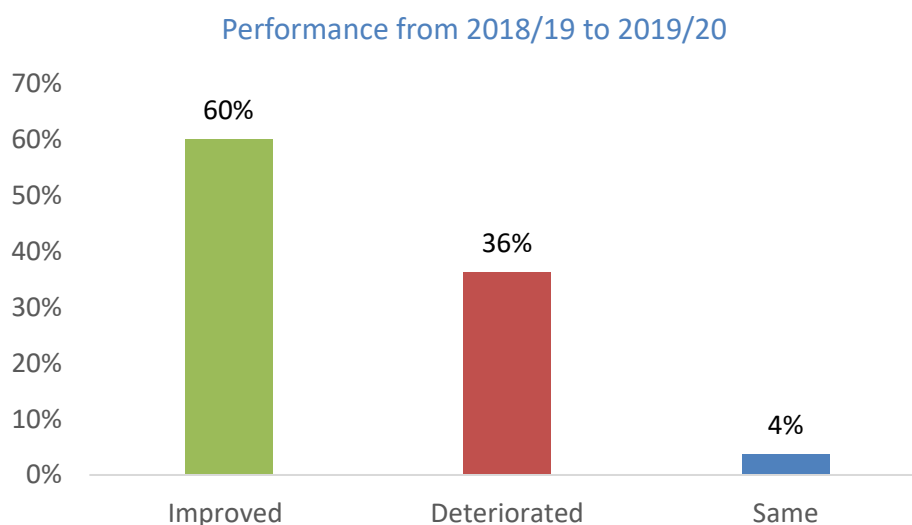

- 3.4 The LGBF data is published on the [mylocalcouncil](#) website, the [Falkirk Council](#) website for public scrutiny and the Members Portal on Pentana with the Important Indicators.
- 3.5 We are working to embed the LGBF data into the performance framework and have linked the indicators to the Corporate Plan priorities as set out in the report to the [Executive Committee on 17 November 2020](#) to monitor progress.
- 3.6 The next Corporate Plan report to Scrutiny in June will provide an overview of all three priorities, Communities, Enterprise, and Innovation with the LGBF indicators.

4. LGBF 2019/20 Performance Overview

- 4.1 There are 97 indicators in total, 80 indicators are reported in this report, the outstanding 17 will be reported later in the year following publication by the Improvement Service. Members will be aware that attainment data for 2019/20 is based on assessments. Previous years data was based on examinations.
- 4.2 The indicators cover service cost, service delivery and customer satisfaction. Analysis of the information is useful in terms of identifying where an increase or decrease in cost has impacted on service delivery and customer satisfaction. We can also identify where there has been an improvement or deterioration in performance and compare our performance to the national average and other individual local authorities, to allow Services to undertake an appropriate course of action.

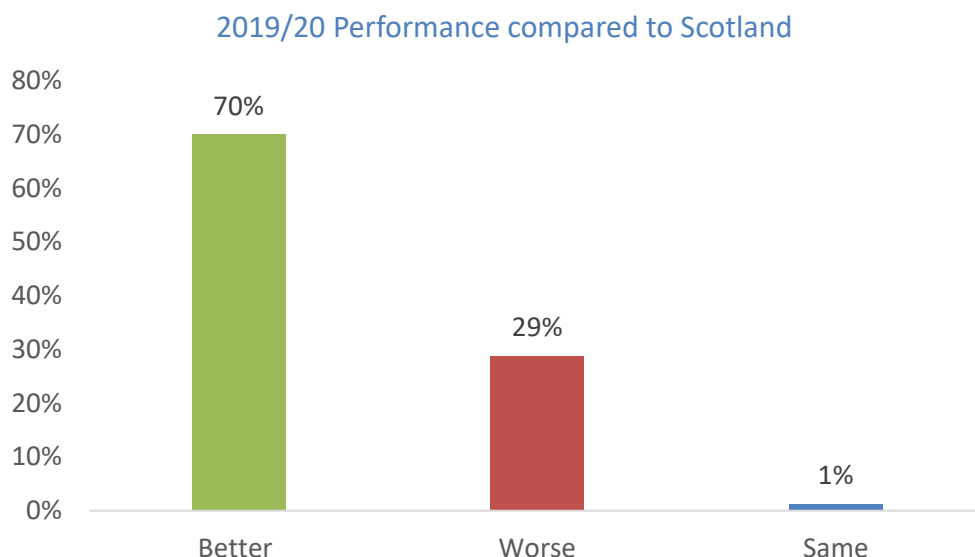

Performance from 2018/19 to 2019/20

- 4.3 The graph below shows the breakdown of the indicators for the Council. From 2018/19 to 2019/20 a total of 48 indicators (60%) improved, while performance reduced for 29 (36%) indicators.

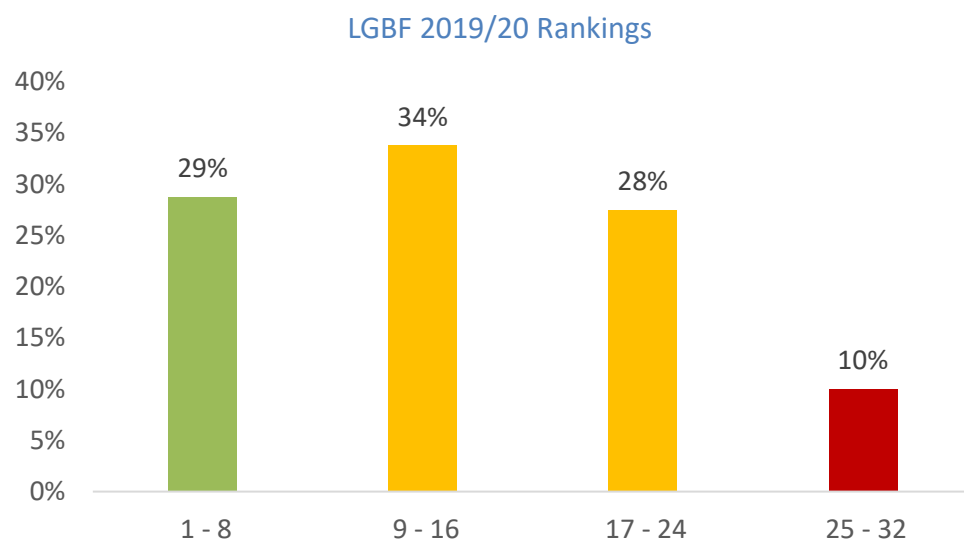

Performance compared to Scotland

- 4.4 The chart below shows a comparison to the national average for 2019/20. 70% (56) of indicators performed better than the national average, while 29% (23) did not perform as well as the Scottish average.

LGBF Rankings

- 4.5 The chart below shows that 29% (23) indicators were in the top eight Councils in Scotland. 61% (29) were in the middle rankings of Councils in Scotland and 10% (8) were in the bottom eight Councils in Scotland.

- 4.6 The appendix details each of the indicators within the themes. Data for 2017/18, 2018/19 and 2019/20 is provided, along with the 2019/20 figure for Scotland and each ranking. Narrative on each of the themes is also given.

5. Benchmarking Family Groups

- 5.1 The Improvement Service usually holds annual national events for each service themes. Due to the ongoing Covid-19 pandemic events were cancelled during 2020.

In February 2021, an event was held presenting the National Overview trends. This looked at financial pressures and policy progress and the impact of Covid-19 on LGBF measures. It also looked at resetting the LGBF strategic priorities for a post-Covid-19 world, this will be discussed over the next year by the Board and Steering Group.

We will initiate benchmarking independently on our priority areas that are not performing well within the LGBF this year. This will be reflected in the Council's Business Plan reported in May 2021.

6. Consultation

- 6.1 There is no requirement to carry out a consultation based on the report.

7. Implications

Financial

- 7.1 There are no financial implications arising.

Resources

- 7.2 There are no resource implications arising.

Legal

7.3 There are no legal implications arising.

Local Government Benchmark Framework

The Local Government Benchmarking Framework is based on seven overall service groupings which cover the major public-facing services provided to local communities and the support services. These groupings are;

1. Children's Services (Education and Child Care)
2. Adult Social Care
3. Environmental Services
4. Culture and Leisure
5. Housing
6. Corporate Support Services
7. Economic Development and Planning.

This report contains the 'Scotland Value' benchmark for each performance Indicator and its quartile position based on 'All Scottish Performance Indicators'.

This report includes three years performance data from 2017/18 to 2019/20.

Where there is no data for 2019/20, this will be released later in April by the Improvement Service.

Where there is no data for 2017/18 or 2018/19, these are new indicators or reported bi-annually.

Performance data for 2020/21 will be available early 2022.

The tables below have a new way of showing the quartiles four green bars means Falkirk is in the top eight councils, while a single red bar means Falkirk is at the bottom eight councils and the bottom quartile. The yellow bars indicate the middle, where we are close to the Scottish average. Three yellow bars mean we are in the higher quartile and two yellow bars means we are in the lower quartile.

Where an indicator underpins the priorities in the Corporate / Business Plan, these are coded in the reference column:

Indicators in Adult Social Care show that there has been an increase in the percentage of people aged 65+ with long terms needs receiving personal care at home, above the Scottish level. The percentage of those who agree they had a say in how their care was provided has increased and is above the national average, however, there has been a decrease in the percentage who agree that they are supported to live as independently as possible.

The proportion of care service rated good or better increased from 2018/19 and is slightly above the national average, but is lower than the 2017/18 score.

Delayed discharges are significantly higher than the Scottish rate and the rate of hospital readmissions are considerably higher than the Scottish rate. Both of these indicators are in the worst eight in Scotland.

SENV7b	% of adults satisfied with street cleaning	71.33%	63.93%	60.60%	62.63%	

Appendix 1

Cost for waste disposal has improved and is in the top eight in Scotland. We have also reduced the cost of waste collection over the three-year period and are lower than the Scottish average. The percentage of household waste recycled is considerably higher than the Scottish average (53.02% compared to 44.85%), however satisfaction with refuse collection is low at 62.23% and in the lowest eight in Scotland.

We have reduced the cost of road maintenance from £10,124 in 2017/18 to £8,742 in 2019/20 (compared to £11,262 in Scotland). While reducing costs, the percentage of B Class and C Class roads that should be considered for treatment has reduced. The percentage of A Class roads that should be considered for treatment has increased from 25.63% to 28.7% from 2018/19 to 2019/20 and is lower than the Scottish rate of 30.57%.
