

CCG11. Hospital Acquired Infection Performance Report

The Committee considered a report by the Area Infection Control Manager which provided an oversight of all Hospital Acquired Infection (HAI) related activity across Falkirk Community Hospital and Bo'ness Community Hospitals from January 2022 to March 2022. This was detailed in Appendix 1 to the report. This included all Staph aureus bacteraemias (SABs), Clostridioides difficile Infections (CDIs), Escherichia coli Bacteraemia (ECBs) and Device Associated Bacteraemias (DABs) with a brief summary of the investigations that have been carried out.

The report also provided details of COVID-19 work. The report contained more graphs to enable the reader to have a more comprehensive and clearer understanding of the data.

Decision

The committee noted the report.
