

Finlay Russell Park

The changes to be carried out at this pilot site are:

- Creation of areas of **naturalised grass (shown in pink)** which will be allowed to grow longer and cut once or twice a year.
- Areas of **spring bulbs (shown in light green)** at the base of the slope in the middle of the park. These will be cut short once the bulbs have finished flowering.
- Creation of **wildflower meadow strips (shown in orange)**. These will be cut once a year.
- Maintaining **short amenity grass (shown in bright green)** in the remainder of the site, cut between 8 and 10 times a year. This includes maintaining strips of short grass between any long grass areas and footpaths.

Note: Some wildflower meadow areas were sown in 2019-20 but additional meadow strips will be created as part of this project.
