

## Hay Park

### The changes to be carried out at this pilot site are:

- Creation of areas of **naturalised grass** (shown in pink) which will be allowed to grow longer and be cut once or twice a year.
- Sowing areas of **wildflower meadow** (shown in orange) which will be cut once a year.
- Maintaining the remaining **short amenity grass** (shown in bright green) with between 8 to 10 cuts a year. This includes a mown grass path through the naturalised and meadow grass areas.

Note: There is potential for additional enhancements at this site such as bulb planting or tree planting. This is not currently shown on the map. Trees could include fruit trees if there is community interest in picking and using the fruit.
